August 15, 1998

Dear Student:

I take great pleasure in informing you of your appointment to the first-year medical class at the Tulane University School of Medicine, to enter in August of 1998. I sincerely hope that you will accept our invitation to take your medical training at Tulane and look forward to having you join us.

In order to reserve your place in the class, we must receive, within the next two weeks, written notification of your intent to accept our invitation. At anytime between now and May 15, 1998, we must receive a check, payable to the Tulane Educational Fund, in the amount of \$500; this deposit will be credited against your first tuition billing. Please understand this deposit is non-refundable and should indicate your final decision to attend Tulane University School of Medicine. We ask that should you decide not to attend Tulane, you inform us in writing so that we can maintain an accurate accounting of our class.

I am sure you will understand that your appointment is contingent upon successful completion of the academic program in which you are currently enrolled, and maintenance of the level of academic performance that was part of the basis for your acceptance. A final transcript of your grades must be forwarded to this office as soon as your school year ends.

You will be receiving additional information concerning summer programs, combined-degree programs, and other topics of interest as the year progresses. I and others at the medical school will try to keep you well informed of all important or interesting topics.

On behalf of the students, faculty, and administration at Tulane, I bid you a most enthusiastic welcome. If I can be of service to you in any way, please feel free to call upon me.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "JCPisano".

Joseph C. Pisano, Ph.D.
Associate Dean

JCP/kj

Dear Members of the Class of 2002:

It seems like a short time ago that we were all gathered in August 1998 in the Grand Ballroom of the Radisson Hotel for freshman orientation. I recall standing on the podium looking out over your eager, if some what apprehensive, faces, vaguely remembering what I felt sitting in the auditorium of Baylor Medical School in Houston on September 3, 1959. Like you, I really did not know quite what to expect in the immediate months and years ahead. Like you, I knew that I was making a momentous step, and I sensed (accurately) that that step would forever change my life, just as surely as it will forever change yours.

At the Radisson I had another feeling - - warm and comforting. I looked out over the sea of your young faces and thought to myself: "You don't have to worry about the future, Doctor, you are looking at it. The future is in very good hands."

You are all a great bunch of people. I have thoroughly enjoyed working with you over these past four years, participating in your education and offering what advice and counsel I could when you sought me out. Academically you are one of the best classes to come through Tulane in many years. Most of you have an enthusiasm for the study of medicine and for the care of patients that is, for me, truly heart warming. Although I have always considered myself to be a patient-seeing-doctor, the reality is that I have spent at least half of my time in administration for the past 25 years. One of the more rewarding aspects of my office is watching your class (and every class since 1977 when I came to Student Affairs) mature both as individuals and as a group, growing from glorified college seniors, over the four years at Tulane, to budding clinicians coming to understand the very serious tasks that are inherent in the practice of medicine - - the care of patients who are entrusting you with their health and with their lives. How rewarding it is to watch you joining, acculturating, and gradually becoming a full member of "this noble profession" in which you will spend the remainder of your lives. Medicine is a very busy life, and I can assure you that the years will pass very quickly. Those years will bring great demands upon your time, your energy, and the other interests you may have, but I am sure that you will make the necessary sacrifices and bring the full measure of credit to Tulane and to our chosen profession. Forty or fifty (perhaps more) years from now, you will be able to look back with the realization that your life was well spent in the service of others and that you have led a life that made a difference. I know I have.

This is not "good bye." Medicine is a small world, and it has been my experience that at the far corners of the earth, our paths shall cross.

I wish each of you a long and prosperous career in the practice of medicine. I am sure that you will do your very best and that most important, you will before all things remember the patient.

Sincerely,

Wallace K. Tomlinson, M.D.

Associate Dean

Director/Registrar of Student Affairs

History of

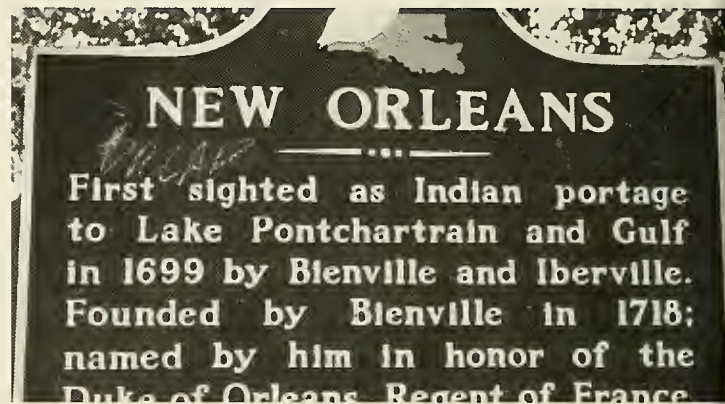

Canadian born Frenchman, Sieur de Bienville and the Scottish Minister of Finance for France, John Law, founded New Orleans (La Nouvelle Orleans), in 1718. The men claimed all the land surrounding the Mississippi River for France and named it Louisiana, meaning "land of Louis" after King Louis XIV. In the beginning the settlers to the area established Baton Rouge but it turned out to be the wrong type of port necessary to control the wealth of the Mississippi River. Bienville moved further down the river and established the "Isle d'Orleans," so named because of the rivers lakes and swamps that surrounded the city. Thus in 1817 La Nouvelle Orleans was established and named after the new Regent of France, Duc d'Orleans.

The two men began designing the layout of the present day French Quarter using a triangle and t-square. The cities beginnings consisted of huts built on the swampy soil and an ineffective wooden levee built to control the floods. In order to build up the population the French government gladly sent a large group of "misfits" and criminals. In order to further populate the city with respectable citizens John Law advertised New Orleans as a paradise and subsequently attracted aristocrats, farmers, merchants, exiles, soldiers, as well as Germans. France was firmly in control of this most valuable port city.

The population of the city changed in 1755 when English victories in the French and Indian War drove French colonists from Nova Scotia. These French citizens were named Acadians and arrived in New Orleans and moved out across southern Louisiana to farm away from the "sophisticated" life of the city.

In 1762 King Louis XV of France was forced to hand over lands east of the Mississippi river to the British and secretly handed over lands west of the river to his cousin King Charles III of Spain. Spain sent Alexander O'Reilly to govern the new lands and he firmly established Spanish Law. Soon thereafter Spanish and French began to mix and a new culture termed Creole was created.

In 1788 New Orleans was engulfed in a fire that burned over 850 buildings to the ground and during a rebuilding period the city again caught fire in 1794. The city was rebuilt, but this time with Spanish architecture as its influence. The brick and plaster buildings with arches, courtyards, and balconies are what we see today in the "Vieux Carre" or old quarter. The modern day French Quarter would be better termed the Spanish Quarter.

New Orleans

In 1792, the English, French and Americans were all interested in taking New Orleans as it controlled the crucial commerce that traveled the Mississippi River. Governor Carondelet built a wall around the city connecting 5 forts and containing multiple canons ready for an uprising or an invasion. The modern day Rampart Street is named because of the canons that occupied the wall at that end of New Orleans.

In 1800 Louisiana was given back to France but was again sold by Napoleon to the United States this time for \$15,000,000 as part of the Louisiana Purchase. The new Americans arriving in the city were snubbed by the Creoles for being too "Puritan" and conversely the Creoles were looked down upon for being too "fun loving." The American settlers thus moved to the area known today as the Garden District.

In 1814 Andrew Jackson defended the city for the United States against the British in the Battle of New Orleans. The city moved into its "golden-age" from 1825 to 1860 with the wealth that sugarcane and cotton plantations brought. Irish, German and Italian immigrants began to arrive daily and the city grew faster than ever.

The beginning of the Civil War ended the "golden age" of New Orleans and the city experienced occupation by Union troops in 1862. The occupation, the abolition of slavery, reconstruction and the decrease of river traffic began to take its toll on the flamboyant life the city had always known. However, as is characteristic of this fair city, she rebuilt herself to become the second largest port in the United States by 1945.

New Orleans is described as many to be the most unique city in the United States. It brings together a jambalaya of cultures including Italian, Irish, German, French, Spanish, English and African. The architecture of the Vieux Carre, Garden District, as well as Uptown is a beautiful collection that not only reflects history but the attitude of the people that made the city what it is today. New Orleans is credited with giving birth to Jazz, a myriad of culinary delights and a tradition of enjoying life and celebrating death that is unseen anywhere else in the world. New Orleans continues to live every day

History of Tulane

Tulane University School of Medicine is the 15th oldest medical school in the nation. It began in 1834 as the Medical College of Louisiana, the first medical school in the Deep South. The Medical College of Louisiana was founded by three young physicians: Dr. Thomas Hunt, Dr. John H. Harrison and Dr. Warren Stone, and were joined by four local physicians as the school's first faculty.

The first class was comprised of 11 students who attended lectures in various borrowed quarters, including a Unitarian church, a lecture room in the State House and wards at Charity Hospital. Next, the medical faculty rented a lecture hall on Royal Street for \$25 per month, where courses in anatomy, surgery, physiology and pathology were taught.

The Louisiana legislature passed a law in 1843 allowing the medical school to erect a building on state property between Baronne and Dryades streets in downtown New Orleans. Two years later, a Constitutional Convention declared that the Medical College of Louisiana would become the medical department of the University of Louisiana. Additional funds were appropriated to erect buildings for the new university. The original medical building was slated to house the new law department and a larger building was constructed for use by the medical department.

By 1859, the number of enrolled students had grown to 276. Just prior to the Civil War in 1861, that number increased dramatically to 404 because of hostilities, which induced Southerners to abandon medical schools in the North. Federal occupation of New Orleans forced the closure of the school in 1862.

In 1865, the school reopened with 185 students enrolled. Devastation wrought by the war and Reconstruction brought difficult times to the school, which struggled for financial survival. But in 1884, local merchant Paul Tulane bequeathed \$1.25 million to establish a new university. The state legislature transferred all departments of the University of Louisiana to Tulane University.

Medical School

Rapid growth necessitated a new facility to house the medical school. In 1893, the Richardson Memorial Building was built on Canal Street named in honor of Tobias G. Richardson, Dean, 1865-1885. Further expansion was possible in 1907, when a new Richardson Building was built on the Uptown New Orleans campus to house preclinical departments. Facilities of the old Richardson Building were enlarged for clinical teaching and the building was renamed the Josephine Hutchinson Memorial.

By 1930, when the medical unit opened at its present location on Tulane Avenue, it was acclaimed as the best medical teaching unit in the South. The preclinical departments remained on the uptown campus until a 10-story addition to the Hutchinson Memorial Building in 1955 allowed the second-year courses to be moved downtown. In 1963, the first-year departments were moved to the building after further additions to the facility were completed, reunifying all four classes for the first time since 1907.

From humble beginnings, the medical school continued to grow to its present state—part of the multi disciplinary major regional medical center encompassing the School of Medicine, the School of Public Health and Tropical Medicine, Tulane University Medical Center Hospital and Clinic and satellite clinics, Tulane Regional Primate Research Center, U.S.-Japan Biomedical Research Laboratories and other research laboratories, and University Health Service on the uptown campus.

Dr. John Roniger

Dr. Roniger is a native New Orleanian, a graduate of Jesuit High School. He left New Orleans to attend Holy Cross College in Worchester, MA, on a Naval ROTC scholarship. Two cold winters convinced him to return to New Orleans and finish his undergraduate years at Tulane.

One summer at sea convinced him to take the Marine option to complete his obligation to the Navy. After his tour of duty in the Marines, Dr. Roniger returned to Tulane for his medical training. (In the 1970's Dr. Roniger was one of the "older" students.)

A year in San Francisco interning at the old South Pacific Hospital was a great experience, but Dr. Roniger and his family were ready to return to their family roots, and back to Tulane for a residency in Psychiatry.

At the end of his residency Dr. Roniger stayed on Staff at Tulane for three years before going into private practice.

After 20 years in private practice, Dr. Roniger was ready for a change and joined Tulane as a part-time clinical faculty member in 1999.

For three years now he has been supervising students and residents in their work and his wife reports that he has thoroughly enjoyed the teaching experience.

Everyone who has worked with Dr. Roniger knows that he gets an early start in the hospital, and hopefully it has not been too difficult on anyone. (H

did give one group alarm clocks at the end of their rotation.)

Each afternoon Dr. Roniger is back uptown at his office seeing private patients. The mix of teaching and seeing patients has been a wonderful experience.

The weekends are a chance to read, play tennis, work in the garden and enjoy his youngest son's baseball games. Dr. Roniger is married to Mary Sue Nelson Roniger and they have three children (only the youngest is still at home), and their first grandchild will soon be a year old.

New Orleans has been a good place for the Ronigers' and so has Tulane!!

Dr. Jeff Wiese

Photo by Terry Thibau

"Anyway, I keep picturing all these kids playing some game in the big field of rye and all. Thousands of kids, and nobody's around - nobody big, I mean, except for me. And I am standing on the edge of some crazy cliff. What I have to do, I have to catch everybody if they start to go over the cliff. I mean if they are running and they don't look where they are going. I have to come out from somewhere and catch them. That's all I do all day. I'd just be a catcher in the rye and all. I know it's crazy, but that's the only thing I'd really like to be."

J.D. Salinger

Jeff Wiese, M.D. is the Chief of Medicine for the Medical Center of Louisiana at New Orleans and Associate Chairman of Medicine for Tulane University. He trained at the Johns Hopkins School of Medicine and the University of California at San Francisco. He is a specialist in hospital-based internal medicine. His research interests include designing and implementing protocols and physician education programs. He is one of the world's foremost authorities on the pathophysiology of the hangover (seriously).

He is also the course director for Clinical Diagnosis and Biostatistics, Teaching in Medicine, and Advanced Internal Medicine. He is extensively involved with the Foundations of the Patient Care course, the Standardized Patient Program, the Internal Medicine Clerkship, the Interdisciplinary Course and the Internal Medicine Residency.

Radiology

Last film of the day...it must be lunch time

Sunglasses: prevents glare from viewbox

Hotlight: doubles as sunlamp for quick tanning between films

Dictaphone: has lost ability to write

Chose radiology because...had to work on the golf game, and, besides, never liked people anyway

Psychiatry

Chose this field because he has his own psychiatric disorder...afterall, it takes one to know one

Courvoisier cognac: for the histrionic patients

Bullet-proof vest: protection against the psychotic patients

Prozac: one for the patient and one for the doctor.

Coffee: caffeine source to keep up with the manic patients

Newspapers: scans police reports for names of familiar patients

ARI POLLACK

Poway, CA
University of California at Los Angeles
BS, Biology
University of California at Los Angeles
MA, Biology

Anesthesiology

Chose Anesthesiology because....was tired of surgery residency

Earplugs: drowns out
the surgeon's yelling

Pocket Russian-English dictionary:
to understand colleagues

All the pharmacology an anesthesiologist
needs to know...all in three syringes

Magazine: for those really long cases

Only doctor who actually asks about the patient's teeth

Which picture is better? Hmm...

Ross Klingsberg

Congratulations Ross. Remember that you are loved and that we will always be beside you. Remember, especially your own special dreams...always there to reach out for and to guide you. You are a winner in our book and the world is lucky to have you as part of it.

David A. Rosen

When you were first born, you were the light of our eyes
As you grew we encouraged you to reach as high as you could
You have surpassed our greatest expectations
Carpe Diem...it belongs to you.

BEST WISHES, JOANNA
LOVE, MOM & WALT

Joanna Locke 11/74

MAY YOU KEEP YOUR TAIL FLUFFY

When Joey was a little girl,
We fed her and we frocked her,
As she grew up and made her way,
We made sure nothing blocked her.

She chose her soul and chose her life,
And made sure nothing stopped her,
We're very proud that she worked hard,
And made herself a doctor.

Great work, Joanna!

Much love,
Mom and Dad

CONGRATULATIONS, CHRIS! WE
ARE ALL SO PROUD OF YOU

"Look to this day for it is life, the very life of
life. In its brief course lie all the verities of
your existence....for yesterday is just a dream
and tomorrow only a vision, but today well
lived makes every yesterday a dream of happi-
ness and every tomorrow a vision of hope."

Put Us to the Test

At LabCorp, more than 260,000 patients put us to the test each day. As one of the nation's largest independent clinical laboratories, LabCorp is a committed partner in the physician/patient relationship. Our vast network of 24 major laboratories and

approximately 900 patient service centers nationwide enables physicians, hospitals, and employers to receive accurate and reliable data in a timely fashion, aiding in patient diagnosis, treatment, and monitoring. Recognized as an industry leader in pioneering new and cutting-edge testing procedures, LabCorp offers more than 4,000 clinical tests ranging from simple blood analyses to sophisticated molecular diagnostics.

LabCorp is proud to introduce a new offering in HIV genotypic resistance testing, HIV GENOSURE™. HIV GENOSURE™ is designed to yield a more sensitive assay at low viral load levels, improve turnaround time for results, and provide a more user-friendly, single page report, aiding physicians in providing better and faster patient care.

ETHICON, INC.

ETHICON is the fastest growing, most inventive medical device company in the world. We have four business units that operate separately under the ETHICON umbrella, yet share the synergy of being part of ETHICON and Johnson & Johnson.

- The **ETHICON Products** business unit of ETHICON manufactures and sells products for wound closure and cardiovascular surgery.

- **GYNECARE**, the women's health business unit of ETHICON, is dedicated to providing innovative solutions for common women's health problems.

Johnson & Johnson Wound Management offers skin and wound products for chronic and acute wound management, burn care and hemostasis.

Mitek produces innovative medical devices for surgical sports medicine and joint reconstruction.

From all of us at ETHICON, best wishes as you embark on your career.

Gracie

COOL
(KIS!!!)

Sarah Mason

Dear Sarah,

I have been proud of you since the day you were born. As the years passed, you have given me more and more reasons to feel proud. You always put out the best effort possible and with amazing results. But what makes me the proudest is the person that you have become--caring, loving and sensitive to the wrongs in the world. You have chosen the perfect field. You will touch hundreds of lives in such a positive way just by being yourself. The world is a more hopeful place with you in it. You are a shining light and those of us lucky enough to be close to you are very blessed. I love you.

Love,
Mom

Deborah Engel

We are blessed that Debbie is caring, adventurous, confident, and fun loving. We delight in sharing her with the world. May her knowledge, experience, spirit, and energy enrich the lives of her patients, friends, and community. With greatest love and affection always

--Mom, Dad, & Kathy.

Eliot Fagley

Eliot,
let your dreams define your goal. High achievement
only occurs in the light of high expectation! Congratu-
lations! We're very proud of all of your achievements.

Lots of Love,
Mom & Kevin
Dad & Connie

Lesley Saketko

Lesley--
Congratulations. We all love you and very proud of
you.

Mom, Dad, Eva, David, Candy and Tess, Isabel,
Chloe, Blossom, Clover, Gingaro

Michael Termini

Michael:

You have accomplished much and we are all so
proud of you for the diligence, tenacity and persever-
ance you have shown in achieving great success.

You have inspired all of us through your dedication
and hard work.

We wish you much success, love, peace and happi-
ness.

Love,

Mom, Dad and Anthony

Lisa Defusco

Lisa:

We are very proud of you; and as you go into the world
our advice to you is to "get a life." Learn to be happy
and think of life as a terminal illness because if you do
you will live it with joy and passion as it ought to be
lived.

We love you,

Mom and Dad,

Michael and Melanie

Brett Wilson II

Brett--
You've embarked upon an adventure of a lifetime--well done!!

Lots of Love,

Monica, Mom & Dad, Anne-Marie & Scott,
Grandpa & Grandma

Derek Liston

Dear Derek,

Congratulations! What an accomplishment! We are all very
proud of you. Your compassion and drive are perfect qualities
for a career in medicine. Best wishes and love from your family.

Jay Anderson

May the innocent perception of your childhood guide you to new discoveries. May it inspire you to care for those entrusted to you with the love and compassion you would give to your family. We are so proud of your accomplishments. We love you very much.

Mom, Ed, Edward, and Grandma

Eliot Jessie

Words cannot express how proud we are of you. You've always dreamed of becoming a doctor as a young child. We ask God to help you continue your dream and guide you on your road to success. Congratulations on your accomplishment. Remember, the world is yours!

Mom, Dad, and Jason

Christina Jones

We want to say how very proud we are of you, for setting goals and reaching them. We know the road has been bumpy and sometimes uncertain but you always remembered what we told you "YOU CAN DO ANYTHING YOU PUT YOUR MIND TO"

Congratulations, Mom and Dad

Kyle Lancaster

This is our Beloved Son in whom we are well pleased.

May the "Light" always show him the "Way".

May the "Truth" increase his wisdom.

May his "Love" be bountiful.

To his Wife, family, and others,

May his "Life" be a blessing to God and country.

Mom and Dad

Mair Parr

As always,
I'm proud of
you and love you!
Keep having a
great adventure,
and I keep the sense
of humor bub-
bling!
All our love,
Mom and Dad

Robert Stwierowski

Dear Bob,
When you were 10 or 11 years old, you told us that you wanted to
be a doctor. We explained how difficult it would be. You said,
"If other people can do it, so can I." Well, you were right!
Congratulations on reaching your dream.

Love,
Dad, Mom, Jim, and Ken

Michael Stuparich

We could tell, even at an early age, what you were destined to
become!! May all of your hopes and dreams come true. We are
very proud of you. Keep up the good work.
Love,
Dad, Mom, and Mally

Jake Bliss

Roses are red.
Violets are blue.
We are all sick--
And waiting for you!

James Martin

To James Furman Martin aka Dragonfly. Congratulations on achieving your dream of becoming a Doctor of Medicine and a Captain in the US Army. No words can express how special we think you are and how proud we are of you. Remember always, you are loved.

LAK, Your Family

Sarah Youssefi

Congratulations, Doctor Sarah Inda Youssefi on all your accomplishments. We are all very proud of you, especially for being such a truly good person. You will bring a special caring and keen intellect to the noble profession of medicine. We love you.

Mums, Pops, David, Debbie, and Carlos

Tammie Glass

Congratulations, Tammie...
We're so proud of you!!!

Love,
Mom and Dad

Patrizia Colbert

After three boys, the sheet draped across the house proclaimed, "IT'S A GIRL." A fiercely independent, creative, fun loving, hard-working, caring, spontaneous girl! A girl whose courageous determination helped her overcome many obstacles in achieving her goals.

God's blessings on you, Trish. What a woman you have become!

Love, Mom & Dad

Kevin Watson

Congratulations!
Kevin M. Watson, M.D.
We wish you continued success and happiness!
"Heaven" is beaming and so are we....
We Love You - Doc!
Your Family

Andy Ferguson

Congratulations, Andy. We are very proud of you!
Your "strength" has carried you through.
Love,
Mom & Dad, Mary & Tim,
Jamie & Nancy & Elise

Julia Foster

Dear Julia,
We admire your courage, determination, enthusiasm, and delight in life. You have always made us so proud. Your patients will benefit from your caring, compassionate, and thoughtful manner. You truly make the world a better place.
We love you very much.
Your Family

Donnelly Wilkes

A parents' dream come true. I'm so proud of the man you are, example of wisdom and integrity for your family. How fortunate we are to share your life as son and brother.
Love Dad

You have integrated into your God given life, your passionate heart for people, your core values, and your thirst for knowledge about the mind and body. How awesome for us to share the journey.
Your Mom

Charan Chakrabarti

Way to go Charan!
You have just become the "Medicine Man."
All of us are very proud of you.
Congratulations and best of luck for all the exciting days to come.
With lots of love,
Mom, Dad, Gora, Ruby, and Lola

Christian Eirich

Christian, we wish you much success and happiness as you begin your residency. We're very proud of you and of all that you have accomplished. Our love and congratulations to our favorite Doctor.

Mom, Dad, Ann, Damian and Matthew

Chuck Dugal

Chuck,

When you were a small boy, you dreamed of becoming a doctor. Your many dreams became projects. Your projects became obsessions, and your obsessions progressed to jobs well done. You have proved through hard work and determination that dreams can become reality.

Congratulations on a job well done. We couldn't be prouder. Love, Mom, Dad and Siblings

Kevin Rolfe

Kevin, we are so very proud of all you have accomplished, as YOU did it!

to describe our "CHILD" you are:

Considerate/Caring

Helpful/Honest

Intense/Intelligent

Logical/Loving

Dedicated/Daring

Congratulations! We wish you great success in all your future endeavors.

Love Always, Mom and Dad

George Toma

George, a handsome and joyful boy, is an M.D. now! Your ambition, motivation, and focus have and will triumph you. God's Blessings adjoin you in your difficult but fulfilling service of mankind and pursuit of life happiness. Heartfelt Congratulations, Love, and Pride in You.

Mom, Dad, Claudine, and Fredo

Nami Horiba Werblin

*Lead a pleasant life;
Toil not, nor spin
In, I want swiftly out;
Out, I want in.*

(From "Cat" by Jan Struther"

Nami, you have come a long, long way!

Proud Parents

Christine Knab

Dr. Christy--
Today your dream has become a reality--we're
so proud of you!
Many blessings--

All our love,

Daddy, Mom, Laura, Maria, & Mark

Quynh Nguyen

Dearest Ngoc Quynh,

Finally, our precious baby has grown up into a
beautiful, successful woman. We are very proud
of you. As you begin your new journey, we
want you to know that we will always be there
to support you.

With Love,

Mom and Dad

Lance Stuke

Words cannot express the joy and happiness we share
with you as you graduate from Tulane Medical School.
We are confident with your caring disposition, integ-
rity, and knowledge that you will make a positive
contribution in the medical field. Your dreams have
finally become a reality. May God Bless You.
Mom, Dad, Kendra, and Suzanne

Heather Berkowitz

See what happens when you get an early start on
your homework! WPOY, Heather!

Love, Mom and Dad

MOREHOUSE GENERAL HOSPITAL

The Regional Medical Facility for Northeast Louisiana & Southeast Arkansas

To The Graduates of Tulane University Medical School Congratulations and Best Wishes For The Future

Morehouse General Hospital has grown and prospered since its beginning in the 1930s. The hospital serves thousands of Northeast Louisiana residents and is still growing. Recent additions to the hospital include a 6,000 square-foot maternity and nursery area, a 9,800 square-foot-day-surgery unit, and renovations to patient rooms. The former OB area has been converted into five acute-care patient rooms. Other specialized areas include a hyperbarics unit, oncology, home health agency, rehab services and endoscopy services.

We are still growing, and we are currently involved in physician recruitment. If you are interested in applying, please contact our Administration Department at 318-283-3601 or mail your resume to the address listed below.

Acuson, a Siemens Company and Siemens Ultrasound
commend Tulane University School of Medicine
for its commitment to excellence in medical education.

Best wishes to this year's graduating class.

Here's to a successful future in providing quality patient care.

ACUSON

A Siemens Company

Roche

We Innovate Healthcare *From Research to Real Life.*

We all dream of doing big things.

Solving important problems.

Making a difference. Improving lives.

*Transforming these dreams
into reality requires ambition,
creativity, and a company like ours to
help put all the elements together.*

Roche is a leader in preventing, diagnosing and treating disease, enhancing the quality of life for everyone. We invest almost \$2 billion a year in innovative research, and our capabilities combine traditional biomedical science with the latest advances in biotechnology, genetics and genomics. Our investment in research has led to the recent introductions of important new medicines for obesity and flu. And our current pipeline includes advances for treating cancer, osteoporosis and hepatitis C.

Few companies possess the global strength in both diagnostics and therapeutics that Roche enjoys. By forging closer links between diagnosis and treatment, we're leading the way to a new dimension in healthcare – individualized medicine. This approach identifies the best treatment for a specific individual.

And since we understand that every individual is unique, we strive to ensure a diverse environment. Roche encourages creativity and embraces differences in talent, education, workstyle, lifestyle and culture.

Obesity, transplant medicine, diabetes, breast cancer, hepatitis, influenza and HIV – just some of the real life issues Roche is focusing on. And providing solutions for.

Visit our global website at www.roche.com or
our U.S. website at www.rocheusa.com.

THE OATH OF HIPPOCRATES

I swear by Apollo, the physician, the Aesculapius, and Health and All-Heal, and by God and by whatever I hold most sacred, that, according to my ability and judgment, I will keep this Oath and this stipulation - I will look upon those who shall have taught me this Art even as one of my parents.

I will share my substance with them, and I will supply their necessities if they be in need.

I will regard their offspring in the same footing as my own brethren, and I will teach them this art, if they shall wish to learn it, without fee or covenant.

I will impart a knowledge of the Art by precept, by lecture, and by every mode of teaching not only to my own children but to the children of those who have taught me, and to disciples bound by covenant and oath, according to the Law of Medicine, but to none other.

The regimen I adopt shall be for the benefit of my patients according to my ability and judgment and I will abstain from whatever is deleterious and mischievous.

I will seek to inform my patients fully about their illness and prognosis, and will always remember that the final decision regarding their own life rests with the patient.

I will regard my patients always as fellow human beings and will do everything possible to preserve their dignity.

With purity and with holiness I will pass my life and practice my Art.

Whatsoever things I see or hear concerning the life of men in my attendance, on the sick or even apart therefrom, which ought not to be noised abroad, I will keep silence thereon, counting such things to be sacred secrets.

While I continue to keep this Oath unviolated, may it be granted to me to enjoy life and the practice of the Art, respected by all men, in all times.

But should I trespass and violate this Oath, may the reverse be my lot.

(justified)
