NEW ORLEANS,
LOUISIANA
1995

Tulane University Medical College Of Louisiana

The Tulane University School of Medicine began as the Medical College of Louisiana in September 1834, as three brash young physicians came together and initiated medical education in Louisiana. Establishment of the school was met with considerable opposition from the Creoles, whose European ideas concerning medical education stressed academics well grounded in the Latin and Greek classics. Nonetheless, when the Medical College opened its doors in January 1835, it became the first medical school in the Deep South, and the fifteenth in the country.

There were only eleven students in the first class. Tuition, fees, room, and board came to less than four hundred dollars a year. The first few years were difficult ones as deans seemed to come and go, and faculty members changed as frequently. By 1834, however, there were over one hundred students. Even then, the student body came from as far away as Pennsylvania and Connecticut, which would have been weeks away. They also came from closer states, such as Alabama and Mississippi.

Medical school in those days was quite different than it is today. Only eight months of lectures were required to obtain an MD. The school year was four months long, and the same seven courses were repeated the second "year". The curriculum consisted of courses in Anatomy and Physiology, Chemistry, Materiae Medica, Principles and Practice of Medicine, Surgery, Obstetrics, and the diseases of women and children. Professors received no salary, but were compensated instead by selling tickets to their lectures to the medical students.

The copper mailbox on the first floor of the medical school (Right) is connected to a drop chute which runs down all 10 floors. The new Reily Pavilion of the Tulane Medical Center Hospital (Far Right) even offers valet parking for patients.

Instruction was almost wholly didactic with practical instruction in Anatomy only. The lectures were delivered to the entire student body assembled in a large room or amphitheater.

The stone doorway above the old entrance to the medical school (Right) faces Charity Hospital to greet weary students and residents. Below is the second year lecture hall with those hard, narrow seats.

Clinical subjects were taught in the same manner. Indeed, the unmotivated students could often graduate without ever having attended a delivery, observed an operation, or even examined a patient, as these were to be learned as an apprentice to a physician.

The Civil War brought a halt to all formal medical training in 1862. The Medical College of Louisiana was fortunate to find

Tulane Medical "Hall of Fame" (Left) features composite photographs dating back to 1959. (Below left) The new Health and Environmental research building was completed in 1994. The display case (Below) on the third floor holds only a small party of Tulane's extensive Anatomy display collection available to students.

financial security in the form of Paul Tulane, a wealthy New Orleans merchant, who bequeathed \$1,250,000 to provide for a new university. In 1884, the various departments of the University of Louisiana were combined under the aegis of the new institution, The Tulane University of Louisiana.

In 1910, Abraham Flexner published his report of the ranking and classification of medical schools, with Tulane ranked as one of the top three Southern institutions. At that time, Tulane's prominent faculty included the great Dr. Rudolph Matas, a vascular surgeon, and Isador Dyer, a noted dermatologist who was instrumental in the development of the leprosarium in the small town of Carrville, Louisiana.

In 1913, Tulane boasted a School of Pharmacy, School of Dentistry, School of Medicine, and Graduate School of Medicine (only the latter two remain today).

The Tulane Medical Center was organized in 1969 to broaden Tulane's commitment to medical education, research, and patient care. The first such university hospital in Louisiana, it was dedicated in October 1976. This 300-bed hospital has enabled Tulane to consolidate a wide range of services in a tertiary care environment and it has become a major referral center for the region.

Since its founding 158 years ago as the Medical College of Louisiana, the Tulane University School of Medicine has undergone many changes: the most recent of which have been the addition of a new hospital wing and the J. Bennett Johnson Environmental Health Research building. Though Tulane originally catered to students mainly from the South, it now attracts students from all parts of the United States. From its meager beginnings in 1834, the Tulane University School of Medicine has gone on to confer over 12,000 medical degrees. Those three brash young physicians of 1834 would certainly be proud of the many physicians who have graduated from the medical school they founded.

The Memorial Plaque (Left) above the door to the former Hutchinson Clinic which is now part of the Office of Admissions. The "habit trail" (Above) connects the medical school to the medical center so students and faculty can go back and forth and never have to face the elements.

MARDI GRAS ...

Charity Hospital

A New Orleans Tradition

Steeped in Louisiana history, Charity Hospital is graced with an intriguing and colorful past. It has survived economic hardships, natural disasters, and some of the worst political and patronage problems in the country.

Its charter dates back to January 1736, when Jean Louis, a French sailor, bequeathed his estate to the founding and furnishing of L'Hospital des Pauvres de la Charité (Hospital for the Poor) in French colonial Louisiana. This makes it the oldest continually operating hospital in the United States. (Bellevue Hospital in New York City was established two months later.)

Within ten years, it became necessary to build a new building to replace the overcrowded original structure. The new hospital was conveniently located between a canal, for receiving patients and supplies, and a cemetery, for burying the deceased.

In 1779, a great hurricane reduced Charity to ruins. The hospital was rebuilt with the support of Don Andres Almonester y Roxas, but the facility could not afford a staff of full-time physicians. Most of the patient care was provided by volunteer physicians.

The hospital had to be rebuilt again in 1809 after it was destroyed by a kitchen fire. The indigent sick were temporarily housed in the Cabildo for five years until the new hospital was completed. Even then, the conditions of the patients, the filthiness of the hospital, and the total inadequacy of the attendants was horrifying. Complaints finally reached the governor and the hospital administration, and the fifth site of Charity hospital was constructed in 1833. Later the Medical College of Louisiana was founded nearby, and the Daughters of

Charity assumed control of the hospital. At that time, the entire medical complex was likely among the best of its kind in the world.

Charity Hospital weathered the Civil War and prospered during the remainder of the Nineteenth Century. By 1900 the hospital probably contained almost 2,000 beds, while other hospitals in the city had only 150 beds combined.

"Big Charity", top of page, is the sixth and most recent building to house the oldest hospital in the United States. The seal, above, lies in the floor of the main entrance on Tulane Avenue. The hospital's ambulance service, right, was inaugurated in 1885.

By the 1930's the 100 year old Charity Hospital building again needed to be replaced. However, because of Huey P. Long's political shenanigans, federal funds to support the project were withheld until after his assassination in 1935. The current structure was completed four years later.

In the 1940's and 1950's many changes took place. The Ochsner Clinic emerged as a competing institution. Both it

and the Veterans Administration Hospital developed their own competing residency programs. Controversies between Tulane and Charity which had begun under Huey Long in the 1930's were complicated by the rise of the LSU Medical School.

The financial difficulties that have always plagued the hospital continued. Since 1975, Charity has lost its accreditation on several occasions. This in turn threatens not only the hospital but also the medical education provided by both medical schools.

As part of the State of Louisiana's effort to save the ailing institution, Charity Hospital has undergone a number of changes in the last few years. The name was modified to the Medical Center of Louisiana/Charity Hospital. Hotel Dieu, a nearby hospital, was purchased by the state and renamed University Hospital. Most of the inpatient services have been moved to this site which will likely serve as the sixth site of Charity Hospital.

Charity Hospital is a hospital with a very long and colorful history which is appropriate for an institution in a city like New Orleans with an equally colorful past. While it may have often been in financial difficulty, it has provided a great service to a population which may not otherwise have received medical care. Furthermore, it provides medical students with the opportunity to work with people they would rarely encounter otherwise and to receive hands on learning experience of both medicine and the face of poverty. Charity Hospital is one of the most valuable assets available to Tulane medical students.

Recently many of Charity's inpatient services have been moved to University Hospital, left. Despite this, the emergency room at the current Charity, below, is still a place of constant activity.

The fifth Charity Hospital, built in 1833, left, also faced Tulane Avenue. The amphitheater on the twelfth floor, above, is still used for "Bullpen" sessions now as it was in the past.

HALLOWEEN

You Know You're At Home In New Orleans When...

You drink "Dixie", not sing it.

You not only say Tchoupitoulas, but you can say it without laughing.

You have discovered that those four-inch long cockroaches can fly, but have decided to retain your sanity anyway.

You begin to believe that purple, green, and gold look good together and will even eat things those colors.

You know exactly what you are going to eat next Monday, and the Monday after that, and after that.

You are no longer shocked when someone advises your to "suck the heads and eat the tails".

You make groceries, not buy them.

You're not afraid when someone wants to "axe" you.

You consider it a honor, on certain occasions, to have cabbages or coconuts thrown at you.

You are able to make a U-turn on St. Charles Avenue avoiding joggers, other drivers and moving streetcars.

You describe items of a certain hue as being "K&B purple".

You get on a bus marked "Cemeteries" without a second thought.

You do not think about spinach when you see the word "Popeye's".

You've finally mastered the technique of hitting a cockroach with a shoe just hard enough to kill the cockroach but not ruin your Oriental carpet.

You'll only eat a sandwich that's bigger than your head.

Black Ties And Tails

Cadaver Ball and Charity Benefit

Welcome to Anatomy Island

Excerpts from 1992 Cadaver Ball Program

| Mrs. Howell | as | Dr. Anderson |
| Ronald McDonald | as | Dr. Harlan |
| Juan Valdez | as | Mr. Mascorro |

And Introducing:

McGuyver as Dr. Mason

Yatesisms

Billions, and I mean *billions* of sperm.
There's one... and there's another one...I don't know
what that is...but there's another one...there's one...
This? This hereah's some crud on the slide.
Alllll the way around
Seminiferous tubules from here to the Supahdome.
Lar-ynx NOT Lar-nyx.
Take out that catheter and you gonna have a stream like an
8-year old.

Gunner Fantasies

24 hour-a-day, 7 day-a-week library hours with on-site parking
4-color pen with silencer (does not click)
Multi-color pen with 128 colors (just like Crayola)
3-day weekends before every exam (72 hours to study)
Cot in Kodachrome room
Take home cadavers
All seats in lecture hall 5 feet from screen
A piece of Dr. Ayettey's lab coat as a talisman
Old exams for the past 17 years
Ambidextrous note taking skills (useful for double slide
projectors)

Top 5 Things Tulane Will Do With the Extra \$14,208,000 From the Tuition Increase

5. Pay for even more air conditioning in the T-1 lecture hall
4. Remove Hawthorn[†]
3. Increase the number of Physiology exams from 6 to 12[‡]
2. Convert the cafeteria into a five star food court[‡]
1. Connect every building in the downtown area with
habitrails[‡]

[†] On the drawing board

[‡] Already completed

T-1 Fantasies (Things We'd Like to See More of)

Brainstem models with batteries
Pillows in lecture hall
Silicon on dry erase board for Dr. Yates
The sun
Cartoons in notesets
Notesets without mistakes
California

Things We'd Like to See Less of

Owl Club votes
Fire alarms
Smooth muscle, peripheral nerve, tendon...
Air conditioning in lecture hall in winter
"Eager" reactions
Californians

Anatomy Island Dancers!**

Flora and Fauna of Anatomy Island

Ayettuus sethius. Harmless, mostly. Easily recognized by its booming voice, *A. sethius* has never been known to attack or injure a tourist. However, it has upon occasion trapped small groups in its lair for as many as 4 1/2 hours, where it confuses them with arcane scribbles, strings of Latin/Greek sentences, and sphinx-like riddles (i.e. If pus is somewhere, but pus is nowhere, where is the pus?). Mating call: "Oh dear."

Hamorius eagerus. POTENTIALLY DANGEROUS. Eager, not spontaneous. Known to shred innocent victims to pieces during presentations. Source of the religion known as psychobioenergetics. Lair has many different diameter pipes with water in them thought to have some symbolic meaning, but not well understood. Mating call: "Eager, eager, eager!"

Harlenticus richardus. OBSERVE WITH CAUTION. A beast with a temper to rival that of a wild boar, its primary hunting tactic is to blind and/or confuse its prey with a barrage of Kodachrome images, followed by repeated lashings with questions involving the embryological origin of brain sand and toejam. Fortunately for visitors, *H. richardus* has only been known to attack people who either stray into the forest at night or who turn up late to neuroanatomy lectures. Mating call unknown, no known witnesses exist today.

Hillpies stephicus. DANGEROUS. The largest reptile on the island, *H. stephicus* has been known upon occasion to attack groups as large as 148 at a time. Armed with a seemingly unlimited arsenal of obscurely worded questions, this animal flies into a rage when students don't follow his directions before embryology examinations. AVOID IF POSSIBLE. Mating call: various blonde jokes.

Kirbaneous geraldii. DANGEROUS. A primary carnivore, *K. geraldii* can be identified by low set brow, large hands, and ponderous build. Noted for its viciousness, this beast is usually found carrying the bones of previous victims, which it uses to torture the innocent. Can easily be avoided if visitors remain at least 300 yards from any native burial grounds. Mating call: "Place it on your mental cadaver."

Josephius weberius. MOSTLY HARMLESS. A relative of the Turkey Vulture, this species competes fiercely with *M. nodocorius* out of both necessity and spite. Its unusual habits include an insatiable thirst for White Russians and a tendency to leer at females of nearly juvenile age. Will actively try to harass tourists. The only endangered species not under federal protection. Mating call: "What's the chance of this one being on the test?"

Mascorropes nodocorius. A relative of the Agave plant, this short, barrel-like cactus is found growing around practically any watering hole on the island. Although armed with an impressive array of spines, it uses these weapons only against the avian species *J. weberius*. The species encountered on the island is, in fact, an escaped transplant from the primitive land of Tia Jhuwhana. DO NOT EAT.

MEDICAL STUDENTS

INSIDE ...

AND OUT .

Coffee Spots

New Orleans entertains its tourists in its many coffee houses, famous for their unique blends of exotic bean and the flavor of chicory. Medical students, however, soon discover that coffee is much more than a cultural and social drink. Soon after the first exam, the medical student needs a constant supply of caffeine to stay awake during the many long nights of endless study. As T-3's, coffee helps the weary student through long nights on call, morning rounds, "interesting" conferences, and post-call evenings. After many days like these, the med student learns of the numerous places to study, stay awake, and even pawn a free cup of coffee. Here are a few of our favorite coffee houses that we found to help us stay awake through four years of medical school.

And Watering Holes

New Orleans also has a nationwide reputation as a great place to “let your hair down” at numerous famous, and infamous, bars, clubs, and taverns. Travelers from across the globe come to explore the French Quarter, including Bourbon Street. Medical Students have also been known to frequent these and other various establishments. There are the small places near the school where, on a Friday evening, one can network with residents, faculty, or hospital staff. Other locations are known for their beer selections or pool tables. Both in the French Quarter and around town there are several favored watering holes for thirsty students, and one can usually find a familiar face somewhere in the crowd. Depicted here are but a few of the many spots we’ve enjoyed during our stay at Tulane.

Class Sponsors

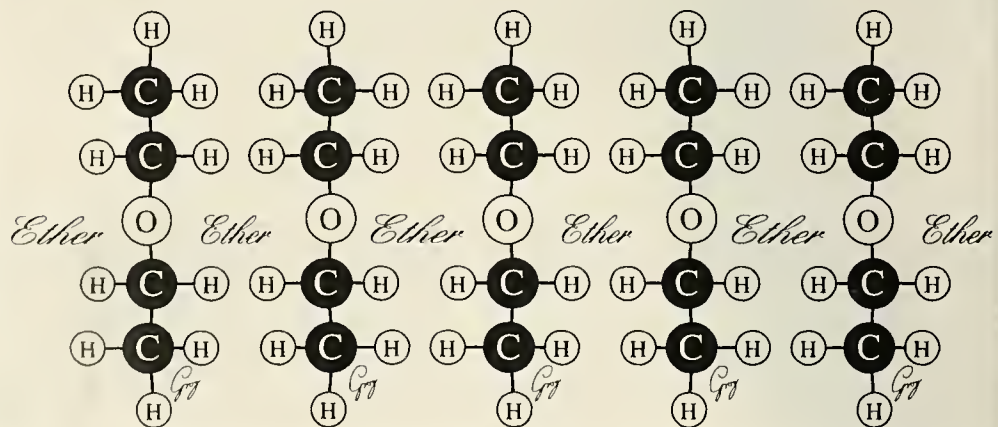

Our class has chosen two very special faculty members to be our sponsors: Dr. Paul Rodenhauer and Dr. Alan Grogono. These two remarkable individuals share in common a love of teaching, outstanding service to the school, and an excellent rapport with students.

Alan W. Grogono was born in London, England and did his undergraduate studies at London University. He completed medical school and internship at London Hospital, followed by a residency in anesthesiology at King's College Hospital, also in London. In 1964, Dr. Grogono came the U.S. to serve as Assistant Professor at the State University of New York in Syracuse for two years, before returning to work in London. He made his final immigration to the U.S. in 1974 to become Associate Professor of Anesthesiology, again at SUNY. Tulane was very fortunate in successfully recruiting Dr. Grogono to the position of Chair of Anesthesiology in 1981. In addition, he also holds the distinguished title of Merryl and Sam Israel Professor of Anesthesiology.

A member of numerous societies, Dr. Grogono has also served on editorial boards for various anesthesiology journals, as course director for anesthesiology review meetings, and as a founding board member of the Society for Technology in Anesthesiology. Recently, he was also nominated to serve as President of the Association of Anesthesiology Program Directors. Dr. Grogono has held many notable speaking engagements, as well as contributed numerous journal publications, books, and book chapters. Lastly, Dr. Grogono is an avid "creator" — of various anesthesiology inventions; of educational, technical, and management software; of "motorized" mobiles; and of 3-D images (an example, appropriately depicting the structure of ether, is demonstrated below).

Dr. Grogono is married; his wife, Dr. Anthea Grogono, is Associate Professor in the Department of General Dentistry at LSU School of Dentistry. They have four children, the oldest age 29 and youngest age 25. Sally, his second child and one of our own classmates, seems to take after her father in her fun-filled and caring attitude toward life and others. Characteristic of his good nature, Dr. Grogono tries to devote one week each year to giving anesthesia in an underdeveloped country for the traveling plastic surgery charitable group, Interplast. Also of note is Dr. Grogono's love of sailing — he even established the world record in 1977 for high speed sailing in a 'B Class' catamaran.

Dr. Alan Grogono is well known for his outgoing personality and wit, abilities which have served him well as co-emcee in several Talent Shows at the Medical School. In front of the class room he is an engaging and entertaining lecturer. "Grog" as he is known to all of us, is a willing and enthusiastic participant in many student activities — as advisor to the Tulane Anesthesiology Interest Society; as mentor to his T-1 orientation group during all four medical school years; as host to numerous crawfish boils; and now as a well-deserved third-time class sponsor. Dr. Grogono finished off the end of our medical school years with a wonderful graduation week party. His door is always open to students and residents and we thank him for his never ending cheerfulness and wit.

Dr. Grogono, pictured here with one of his motorized mobiles.

For 3-D effect: Bring image close to face; slightly cross your eyes until you now see three black dots instead of two; then focus toward general image to achieve 3-D effect.

Born in New York City, **Paul Rodenhauer** grew up in Lancaster, Pennsylvania and graduated cum laude from Gettysburg College. In medical school at Jefferson Medical College in Philadelphia, he was elected to Alpha Omega Alpha Medical Honor Society. Following his rotating internship at York City Hospital in Pennsylvania, Dr. Rodenhauer spent two years in General Medicine private practice, prior to choosing a career in Psychiatry. He subsequently completed a psychiatry residency at Sheppard & Enoch Pratt Hospital in Towson, Maryland and a fellowship in Administrative Psychiatry at the Washington School of Psychiatry in D.C. During this time, for six years he also served as a Captain for the Pennsylvania Army National Guard.

With a natural talent for academics, Dr. Rodenhauer has held many notable academic, administrative, and clinical positions at various institutions, including John Hopkins, Brooklane Psychiatric Center, Georgetown University School of Medicine, the University of California San Diego, Wright State University School of Medicine (where he became Residency Director and then Chairman within just five years of his arrival), and now at Tulane since 1991. As expected, Dr. Rodenhauer received many awards prior to arriving at Tulane, including the Special Presidential Commendation from the American Association of Psychiatric Administrators in 1990.

Having been at Tulane for only four years, Dr. Rodenhauer is Professor of Psychiatry, Director of Medical Student Education in Psychiatry, Assistant Dean of Admissions & Curriculum Management, and Adjunct Professor in the Department of Health Systems Management. His concern for students takes on many forms, including his involvement as prior Faculty Chair to the Phoenix Society, as Faculty Advisor to the student Psychiatry Journal Club, as student confidant, as Talent Show judge, as class sponsor now for two graduating classes, and as host to numerous student receptions, including our semi-formal Match day celebration at the Mason Dupuy in the French Quarter. Reflective of his dedication to teaching and student advocacy, he has been the recipient of many awards during his four year tenure at Tulane: the 1994 W. Clifford Newman Award for Student Advocacy; the 1992,-93,-94 Owl Club Award for Outstanding Teaching; as well as the 1992-93 Tulane Psychiatry Residents' Faculty Award for excellence in Teaching.

Dr. Rodenhauer has given many national and international presentations and has published extensively — journal articles, books, book chapters, book reviews, and even poetry. In addition to his current position as the President Elect of the American Association of Psychiatric Administrators, he has participated on many boards, organizations, and committees. Dr. Rodenhauer has also served on the Psychiatry Accreditation Council for Graduate Medical Education/Residency Review Committee, as an examiner for the American Board of Psychiatry and Neurology, and as a reviewer of numerous medical journals.

Dr. Rodenhauer has three children and is married to a professional photographer and writer, Skye Moody Rodenhauer. A very well-rounded, creative, and modest individual, Dr. Rodenhauer enjoys many outside interests, including theater, biking, photography, appreciating art, writing poetry, and baking bread. He even won first-prize for his "Pumpnickel Beer Bread" recipe in the 1992 annual Times-Picayune contest. In addition, he has also received recognition for his poetry and photography.

Thank you, Dr. Rodenhauer and Dr. Grogono for your leadership, dedication, compassion and open-door policy toward students . . . We future physicians are blessed to have had the opportunity to be influenced in such a positive direction by two important role models such as yourselves.

COASTAL COLOR*

Hérons
and their awkward elegance
escape detection
especially if they're blue

and young
with downy speckles
like the dunes they stalk
in silence.

Primeval
especially if they're brown
pelicans invoke
deeper mysteries of life

unless their white bellies
reflect attention
to the emerald sea
they span

and the wonders
of its glimmering Edens.
Gulls and company
especially if they're flapping

whip up froth
produced by the restless seam
between land and seascapes
which gaped eons before

pelicans emerged.
Especially if they're peckish
these relics can spear
flashier but scallier

specimens
who can't either appreciate
that the orchid pink membranes
they shimmy down

resemble tropical petals
that forecast
sweeter morsels
sheathed in pale yellow.

The Oath Of Hippocrates

I swear by Apollo, the physician, the Aesculapius, and Health and All-Heal, and by God and by whatever I hold most sacred, that, according to my ability and judgment, I will keep this Oath and this stipulation- I will look upon those who shall have taught me this Art even as one of my parents.

I will share my substance with them, and I will supply their necessities if they be in need.

I will impart a knowledge of the Art by precept, by lecture, and by every mode of teaching not only to my own children but to the children of those who have taught me, and to disciples bound by covenant and oath, according to the Law of Medicine, but to none other.

The regimen I adopt shall be for the benefit of my patients according to my ability and judgment and I will abstain from whatever is deleterious and mischievous.

I will seek to inform my patients always as fellow human beings and will do everything possible to preserve their dignity.

With purity and with holiness I will pass my life and practice my Art.

Whatsoever things I see or hear concerning the life of men in my attendance, or the sick or even apart therefrom, which ought not to be noised abroad, I will keep silence thereon, counting such things to be sacred secrets.

While I continue to keep this Oath unviolated, may it be granted to me to enjoy life and the practice of the Art, respected by all men, in all times.

But should I trespass and violate this Oath, may the reverse be my lot.

Following Their Own Path

Some classmates have chosen to take some time to pursue research interests, start their families, or transfer to other schools. We will miss them at graduation time, and we wish them the best of luck.

Rhonda Bass, Russell Clark, Rex Hoffman, Chris Mottes and Dominic Nguyen have provided pages in the yearbook.

SIGNS AND SYMPTOMS OF MEDICAL STUDENTS

| | T-1 | T-2 | T-3 | T-4 |
|-----------|----------------------------------------------------------------|------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------|
| General | Bright eyed and neatly dressed. Smells like formalin. | Confused. White coat is starched and white. Avoids T-1's smelling of formaldehyde. | Disheveled. Semi-conscious. Coat weighed down with handbooks, gloves & hemocult developer. | Remembers fashion just in time for interviews. White coat now beige, stuffed with drug company pens & toys. |
| Eyes | Glasses needed after contacts are dissolved by formalin fumes. | Pupils permanently dilated after student ophthalmoscope exams. | Eyes more bloodshot than a Monday night after exams. | Too cool to take shades off indoors. |
| Pulmonary | Shortness of breath from complaining about exams. | Respiratory distress and wheezing manifests after asthma lecture. | Chronic cough and sinusitis from recurrent pediatric viral infections. | Paroxysmal respiratory arrest on Match Day. |
| CVS | Palpitations on Mondays. | Chest pain during board exam. | 2+ pitting pedal edema. | Atrial flutter (Holiday Heart?) on graduation day. |
| Abdomen | Weekly epigastric pain relieved by Roloids and Alka-Seltzer. | Alcoholic gastritis. Ileus from practice abdominal exams done by roommate. | Audible hunger noises arrested by milk and chocolate from vending machines. | Renourished from free lunches provided by drug companies. |
| Skin | Coccygeal bruising. | 1st degree burn from week in sun "studying" for boards. | Residual suntan wilts under the florescent glow of Charity. | Regains tan while doing community medicine in Jamaica. |

Those First Two Years

The Clinical Experience

The Class Of 1995

The 150 students graduating in 1995 were the last complete class to be chosen by the late Dr. Wiley Clifford Newman. With his usual knack, he gathered together students from 35 states and one foreign country to form this diverse and interesting group. Over a third (35%) of the students were from California, while only 11.5% were local Louisianians. The remaining 53.5% of the class was widely distributed throughout most of the United States, providing a unique cultural experience for everyone.

B.S., Neuroscience, 1989*

ITHACA

When you start your journey to Ithaca,
then pray that the road is long,
full of adventure, full of knowledge.
Do not fear the Lestrygonians
and the Cyclops and the angry Poseidon.
You will never meet such as these on your path,
if your thoughts remain lofty, if a fine
emotion touches your body and your spirit.
You will never meet the Lestrygonians,
the Cyclops and the fierce Poseidon,
if you do not carry them within your soul,
if your soul does not raise them up before you.

Then pray that the road is long,
That the summer mornings are many,
that you will enter ports seen for the first time
with such pleasure, with such joy!
Stop at Phoenician markets
and purchase fine merchandise,
mother-of-pearl and corals, amber and ebony,
and pleasurable perfumes as you can;
visit hosts of Egyptian cities,
to learn and learn from those who have knowledge.

Always keep Ithaca fixed in your mind.
To arrive there is your ultimate goal.
But do not hurry the voyage at all.
It is better to let it last for long years;
and even to anchor at the isle when you are old,
rich with all that you have gained on the way,
not expecting that Ithaca will offer you riches.

Ithaca has given you the beautiful voyage.

Without her you would never have taken the road.
But she has nothing more to give you.

And if you find her poor, Ithaca has not defrauded you.
With the great wisdom you have gained, with so much experience,
you must surely have understood by then what Ithacas mean.

Ours was not a meeting, but rather a recognition.

My deepest thanks to those loved ones not pictured, both from my family and from Tulane, for your continued support and encouragement. Med school was far more emotionally challenging than I had anticipated; and I may not have found the strength and courage to continue were it not for your letters, phone calls, visits, and care packages.

"To be safe he has only to sacrifice living. In safety there are no fears to conquer, no obstacles to overcome, no wild screaming dangers stalking behind the fence of our mistakes."

Oh, I have slipped the surly bonds of Earth
And danced the skies on laughter-silvered wings;
Sunward I've climbed and joined the tumbling mirth
Of sun-split clouds — and done a hundred things
You have not dreamed of — wheeled and soared and swung
High in the sunlit silence. Hovering there
I've chased the shouting wind along and flung
My eager body through footless halls of air.
Up, up, the long delirious, burning blue
I've topped the wind-swept heights with easy grace.
Where never lark, or even eagle flew;
And, while with silent, lifting mind I've trod
The high untrespassed sanctity of space,
Put out my hand, and touched the face of God.

-adapted from High Flight
by John Gillespie Magee, Jr.

Dear Friends and Classmates,
As you go out into this great world to try out your healing hands, please don't forget to love your family at least as much as you love your work. . . . And remember that because everyone dies someday, you must be sure that you've learned to live. Blue Skies Forever

A Physician's Prayer

Lord, Thou Great Physician,
I kneel before Thee. Since
every good and perfect gift
must come from Thee,

I PRAY:

Give skill to my hand, clear
vision to my mind, kindness
and sympathy to my heart.
Give me singleness of pur-
pose, strength to lift at least
a part of the burden of my
suffering fellowmen, and a
true realization of the rare
privilege that is mine, Take
from my heart all guile and
worldliness, that with the
simple faith of a child I may
rely on Thee. Amen.

Are You An OB/GYN?

Baby's Mom-22 yo G4P0121
EGA 29 wks., previous c-sec-
tion of unknown scar, no prena-
tal care, presents to L&D with
footling breech hanging out.

Doctor-"This may be a foot, but
let me check first". Keep Push-
ing

PUSH-two, three, four, five, six, seven, eight, nine, ten.

Ultrasound Jelly-to hear
decels better

Fetal Monitoring Strip-
for uterine contractions
and Dow Jones Industrial
Avg.

Bucket-to catch noenate
n case it slips

Mask-only used in the
smelly deliveries

"Those Hairy Legs"

Stirrups-no, "heel rests",
no "leg holders", just put
your feet here!

Birth Wheel of torture for
estimating EDL(esti-
mated date of litigation)

Karyotype from early
amniocentesis. Can you
make a diagnosis?

'I wonder if the strip to
he right indicates dis-
ress????

Chose OB/GYN because---needs minimal
sleep.

Success

To laugh often and much;
to win the respect of intelligent
people and the affection of
children;
to earn the appreciation of honest
critics and endure the betrayal
of false friends;
to appreciate beauty,
to find the best in others;
to leave the world a bit better
whether by a healthy child, a
garden patch, or a redeemed
social condition.

To know even one life has
breathed easier because you
have lived.

This, is to have succeeded.

- Ralph Waldo Emerson

Are You An Otolaryngologist?

Back up tissue - for the occasional tidalwave

Tongue depressor and cotton swab practice for using chopsticks. Say th.

Tissue - for the Unbearable Wetness of Beings

Head gear - can also be used as rear view mirror

Smile - thinking how little they work and still can be considered as surgeons

Tie - Used to distract patients during examination

Stethoscope - Slung over shoulder for effect. Used for pre-op eval. and reassurance.

Went into ENT because

- A. Has smooth touch with ear wax
- B. Wanted to use cool head gear
- C. Wanted 3 day workweek
- D. Liked having unpronounceable specialty name to sound important at parties.
- E. Prefers to pick other people's noses

HUMAN FAMILY

I note the obvious differences
in the human family.
Some of us are serious,
some thrive on comedy.

Some declare their lives are lived
as true profundity,
and others claim they really live
the real reality.

The variety of our skin tones
can confuse, bemuse, delight,
brown and pink and beige and
purple,
tan and blue and white.

I've sailed upon the seven seas
and stopped in every land,
I've seen the wonders of the world,
not yet one common man.

I know ten thousand women
called Jane and Mary Jane,
but I've not seen any two
who really were the same.

Mirror twins are different
although their features jibe,
and lovers think quite different thoughts
while lying side by side.

We love and lose in China,
we weep on England's moors,
and laugh and moan in Guinea,
and thrive on Spanish shores.

We seek success in Finland,
are born and die in Maine.
In minor ways we differ,
in major we're the same.

I note the obvious differences
between each sort and type,
but we are more alike, my friends,
than we are unlike.

We are more alike, my friends,
than we are unlike.

We are more alike, my friends,
than we are unlike.

Are You In Family Practice?

Potatoes - payment for Mrs. Hatfield's last delivery

Windbreaker - practical substitute for white coat

Boots - because it snows in Beaver Rapids

Went into EP because

- A. Loves the great outdoors
- B. Never really wanted to be rich anyway
- C. Wanted to be gatekeepers of medicine
- D. Wanted job security under Clinton Health Plan

Bags Under Eyes - being the only doctor in Beaver Rapids= no sleep

Outdoor Magazine - for planning next fishing trip

Keys - to the Ford Bronco

Wrinkled Pants - from bouncing babies

Are You An Anesthesiologist?

Hat - to look like one of those cool surgeons when strolling down the hallway.

Smile - likes to make fun of surgeons by asking them acid-base questions.

Coffee - to help him through those dreadful 7 am to noon working days

Drug Rep. Fanny Pack - looks cooler than a tool box to carry intubation gadgets.

Sneakers - to walk softly so not to wake up patients

Goggles - temporized for projectile of human body parts

Ear Piece - tuned to country stations only

Date Book - reminds him of the afternoon golf games

Bag - contains recreational anesthetic agents which make him more popular at parties

Went into anesthesia because:

- A. loves OR but not surgeons
- B. thought it was the sober end of blood brain barrier
- C. heard there were lot of free lunches
- D. can calculate pH in torr

Match Day!!!

TIME TO CELEBRATE!

On March 17, 1995, class sponsor, Dr. Paul Rodenhauer, hosted an elegant party for us in honor of Match Day. Almost more so than graduation, Match Day culminates four years of acquiring unquantifiable amounts of knowledge, knowing happiness, feeling sadness or fear, making friends, having fun, and making the transition to "Doctor". For on this day, we learn what the future holds - where we will live, what we will do, and the recognition that our sheltered student lives are soon to end.

Election to Alpha Omega Alpha is a distinction that accompanies a physician throughout his or her career. Especially for the young physician, the society provides a forum for the exchange of ideas, as well as a source of valuable contacts. Members can be elected as students, graduated, or faculty of an affiliated institution, or, because of distinguished achievement in any field, on an honorary basis. Elections in the first three categories are carried out by the individual chapters. Chapters elect undergraduate members from students in their last two years of medical school. Scholastic excellence is not the only criterion for election: integrity, capacity for leadership, compassion, and fairness in dealing with one's colleagues are considered to be of equal significance, and the number of students elected from any class may not exceed one-sixth of those expected to be graduated. The students elected to the society are men and women who, in the judgment of the local chapter, have shown promise of becoming leaders in their profession.

Cary Newman - When you were born, you cried and the world rejoiced. Live your life so that when you die, the world cries and you rejoice. Love Mother and Jerry

Dear **Marika**, we are so proud of your ongoing success. Your innate goodness & generosity will surely lead your patients to speedy recovery. May you be as good a Dr as you are a daughter. Mom and Dad

Hey **Mar!** "Congratulations! We'll miss you Marika. Good luck." Get it? Come back soon so that we can finally take down the banner. Congrats on surviving med school. Luv, 10E

Rafi & Rosie, Bravo - The Neimans

Congratulations **Rob Gensure!** Mom, & Dad

Congratulations **Melissa!** The tea bag will always be strong. Your contribution begins now. Love Mother, Dad & Aundrea

Good luck **Sally** & all of your classmates. From the **Grogs**

Pierre - It was back in 1984, when you washed up on our shore complaining your neck was sore. Now it's 1995, we're all glad that you survived. On your goals may you thrive! Love Dlabals

Congratulations **Barbara!** Your hard work paid off - Love from Dad, Mom, John & Lori, Jim & Debi, Beth, Kathy, Jeff, Margy, John IV, Cameron, and all your friends.

Congratulations **Chris Weldon**, we are proud of you. Love Mom & Dad

Congratulations Doctor **Sandra**. You made us all very proud! Mama, Papa, Andria, Viviana, Scott, Barbara, David and Nicky

Congratulations **Christopher**, Dickens and I know you will be a good Dr. We wish you luck on the long run. Our prayers are always with you. Love Aldegunda and Dickens Juaman

From Deerfield A., to UVA, to Tulane Greenwave, Hooray Hooray We're proud of you **Christopher Coleman Brown**, MD. Love Mother, Dad, Ding, Gregory, and 28 paws

With great pride, joy and love
Congratulations, **Dr. L. B. Tena**. Drs. Leon/Rosie Tena & Family

Simon - Darling son, congratulations on your superb achievement. Love, Aunene and Mike

Carey, to your health, to your happiness. Love from Clan Cullinane

Congratulations, **Brian McGuinness**, Love, Mom.

Congratulations

Congratulations to Dr. **C. Mark Whitehead, III**. Love, Dad, Mom, & David

Dr. **Sylvita Villate**, my youngest child, you are my Love and my pride. Mom

Jeff Carron, we're proud big guy. Onward! Love Mom & Jim

Congratulations **Jim!** Love Mom, Dad, Missy, Jenny & Grandpa!

Kim, you give us great joy and pride. You will surely be a superb physician. Love Mom, Dad, and Danny

Christina! For humanity there exists only good: science. We are proud of you and hope you continue to bring to your work intelligence and virtue.

Dr. **Brian Stafford**, congratulations & continued success during your Internship & Residency! Love Mom, Dad, Brenda & Dan

Christine Chorney, many years of happiness & success. Dad

Congratulations Dr. **Rob Koppel!** We love you! Mom, Dad and Doug

Kim, you'll make a great Doctor, but you are already a wonderful wife! Love Jim

Congratulations **Javier** on your graduation. May your career be blessed with success and happiness. Love Mom, Dad, James, Gwyn & Oscar

Congratulations **Mitch**. Super job. Well done. You will make a good doctor. Love, The Family

Dear **Rolf**, we are so proud of you! Love Mama and Papa

Congratulations **Lynn!** Continued success! Love Mom & Dad

Congrats **Jeff Carron!** Love the Pohl's, Vangel's, Dave & Maja

Pierre! You're on your way and it seems too soon, but fly safely and come home often. Congratulations and best wishes. Uncle Charlie

Kim, congratulations, we're so proud of you! Love, The Mercurios

Congratulations **Tony Ho**, good luck in your residency. Please keep in touch. J. Bruneau

I am so proud of you **Pierre**. Thanks for being such a good role model and for all the words of encouragement. Love always, Arianne

Dr. **Murray Fred Dweck**, much love and many babies. Mom, Dad, Eli, Paul, Ellen, Barbie

Arthur proud of you & love you forever. From Pa, Ma, Amy, Ann

Congratulations to two special people, **Kelly and Jim** With love, Mom and Dad

Cindy, you endeavored to persevere and we are very proud of you. Love Dad, Mom, Steffie & Don

Keri - When I saw your tenacity at age 3, I knew you would succeed at whatever you put your mind to. Congratulations. You're the tops!

Congratulations

Thanks **Brian Shih** for that great drawing, "A Day in the Life of Super Pierre"! Good luck in your Anesthesia program. Ms. B, CRNA

"How much the fool who goes to Rome excels the fool who stays at home," Tuscan Adage. Go for it **Pierre!** Good luck in the Navy and your Orthopedic program. I am so proud of you! Love Mom

Domingo - Sabiamos que lo podias hacer; ahora solo le pedimos al senor que siempre este contigo para que puedas tomar las mejores decisiones para salvar vidas. Te queremos Mami y Papi

Jeannemarie, Congratulations to the first doctor in the family in five generations. We are both so proud of the way you have pursued your own dreams. Love Mom and Dad

Dr. **Li**, I presume? Yes, yes, yes. Congratulations! Mrs. Bruneau

Timothy - Best wishes for continued success. Mom and Dad Cupero

Marisa - Wube lubove yubou, Te amamos, My ciebie kochamy, Ti vogliamo bene, Anachnu ohavim otach, Gia dinh thuong con, Vi alskar dij, Nous t'amions, We love you, Mom and Dad

PhD, MD, MPH ... Congratulations, **Annette**, best of everything ... Mom & Dad

Congrats **Chris**, The Bojkewycz's

Congratulations, **Jeff Carron!** Your wonderful accomplishments have made us extremely proud. All of our love, Dad and Marietta

What you can imagine, you can master. Go for it, **Pierre!** Love, The Hubers

Congratulations **Jason Ozment**. Wishing you great success always. Love - Mother & the clan

It is with great pleasure we say, "Congratulations, Dr. **Laurie Weber!**" Love, Mom, Dad & Bill

Congratulations **Momo!** Dad, Mom, Mariko, Kyosuke, Angela, Muff, Taiko, Francis, Tetsu, and Daisuke.

Congratulations **Brent!** We are so proud of you and know you will be a great MD. Love, Mom, Dad, Alys, Alan, Anne & Ashley

Congratulations **Chris Chorney!** Love Mom

Your long Journey is over, **James**. We are so proud of you and excited for you. Love Dad, Martie, and Brynn

Congratulations **Annette Kyzer!** You'll be an excellent Physician. Love Dad, Mom, and Christina

Pierre congratulations & best wishes, from go-cart driver to MD, Wow!

Congratulations **Dari!** Our vision of your future is 20/20. Love Mom, Dad, Lisa, and Andrew

YOU'LL FIND A DOCTOR FROM TULANE ON EVERY CORNER.

*Y*OU'LL KNOW IT'S A SMALL WORLD WHEN, ON VACATION OVERSEAS SOMEDAY, you seek medical care, only to discover that the doctor treating you was trained at Tulane.

Actually, it's no surprise. Tulane has been training some of the world's most well-respected physicians, specialists and medical researchers for over 150 years.

Many of today's medical breakthroughs were discovered at Tulane. And much of the research that will impact health care in the future is now underway at Tulane. So we not only create the cures, we create the doctors who use them as well.

Best of all, you don't have to go to the ends of the earth for world class health-care. *It's just around the corner.*

Who Will Be The Fattest At Your Ten Year Reunion?

School teaches you how to make money. But it doesn't teach you what to do with it. We suggest putting it in the bank. Ours, for instance. Because we can show you ways to turn a little bit of money into a big fat bundle of cash.

Children's Hospital
congratulates the graduates of
Tulane University School of
Medicine.

Many of you have completed clinical rotations at Children's Hospital in pediatrics, pediatric subspecialties, pediatric rehabilitative medicine, pediatric orthopaedics, pediatric surgery, pediatric surgical subspecialties, pediatric radiology and other areas.

As your residencies and fellowships progress, we hope that many of them will bring you back to Children's Hospital so we will have the opportunity to watch you grow professionally.

We congratulate you and wish you much happiness and fulfillment in the future.

**The Tulane Division of
Plastic Surgery**

Congratulations, Doctor, you're on your way!

But keep in mind ...

We also keep the true role of the doctor in better perspective. The doctor is not a miracle worker who can magically save us but, rather, an expert adviser who can assist us in our own recovery.

- Michael Crichton

Thanks Staff!

This book represents the combined effort and labor of several different people, all of whom were vital to its completion. With gratitude, I'd like to recognize the following: Christine Chorney, co-editor and ads manager who took over while I was out of commission; Annette Kyzer and Sally Grogono who put together the faculty pages; Sylvia Villate, the "Yearbook Princess"; Shelly Garone who talked me into doing this job (she may be forgiven by the time she pays off her loans); Murray Dweck, Art An, and Shirley Chen who dedicated many hours to layout and copy; and Paul Shea and Ben Kam who successfully sold ads for the book's financing. Finally, thanks to all of you who dropped by the office and were willing to be put to work.

Bedford, MA 02155

Dear Mr. Garone:

I take great pleasure in informing you of your acceptance into the first-year medical class at the Tulane University School of Medicine, to enter in August of 1991. I sincerely hope that you will accept our invitation to take your medical training at Tulane, and look forward to having you join us.

IN MEMORIUM

**W. CLIFFORD NEWMAN
1931-1992**

What can I say about Dr. Newman?

He saw in me the potential to carry the name of Tulane with honor. He offered me the chance to aspire to my life long dream of being a physician. He gave me his understanding, his laughter, and his time when I was feeling overwhelmed by the pressures of medical school. He believed in me and in my capacity to learn and grow.

I am saddened that I will not be able to share my excitement and honor with Dr. Newman at graduation. I will always remember him.

-Shelly Garone

In behalf of the students, faculty, and administration, I bid you a most enthusiastic welcome to Tulane. If I can be of service to you in any way, please feel free to call upon me.

Sincerely,

W. Clifford Newman, Ph.D.
