TULANE UNIVERSITY SCHOOL OF MEDICINE

CLASS OF 2005
T-WAVE
VOLUME XIX
NEW ORLEANS, LOUISIANA

To the memory of our classmate and friend,
Andy Martin
(1972-2004)

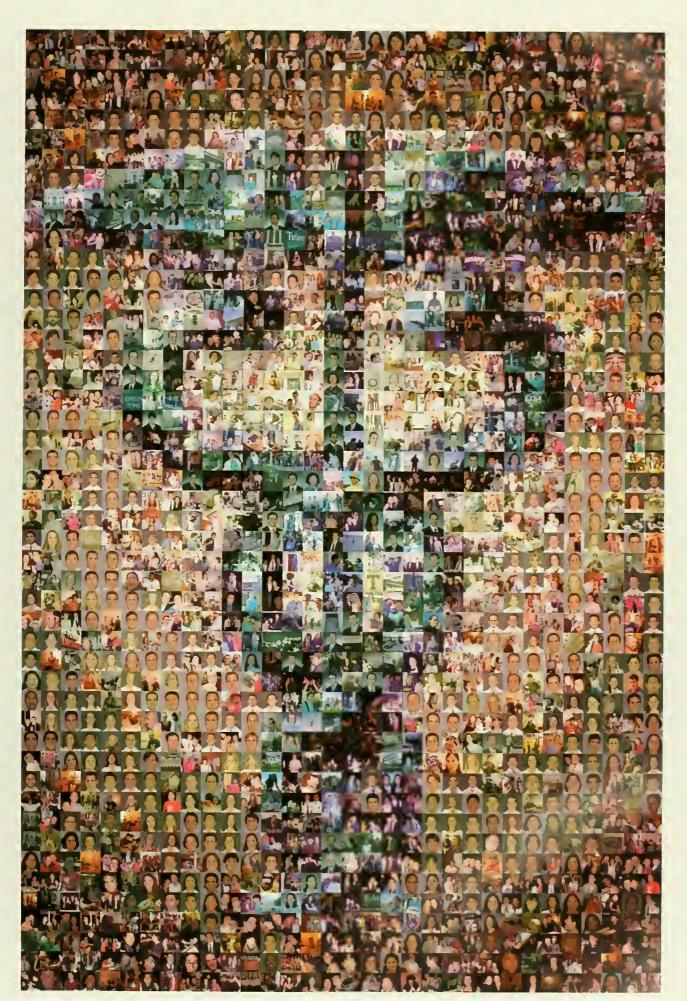

Tulane University Medical Center

Office of Admissions SL67 1430 Tulane Avenue New Orleans, Louisiana 70112-2699 (504) 588-5187 Fax: (504) 988-6735

December 15, 2000

Dear Class of 2005.

I take great pleasure in informing you of your appointment to the first-year medical class at the Tulane University School of Medicine, to enter in August of 2001. I sincerely hope that you will accept our invitation to take your medical training at Tulane and look forward to having you join us.

In order to reserve your place in the class, we must receive, within the next two weeks, written notification of your intent to accept our invitation. At anytime between now and May 15, 2001, we must receive a check, payable to the Tulane Educational Fund, in the amount of \$500; this deposit will be credited against your first tuition billing. Please understand this deposit is non-refundable and should indicate your final decision to attend Tulane University School of Medicine. We ask that should you decide not to attend Tulane, you inform us in writing so that we can maintain an accurate accounting of our class.

I am sure you will understand that your appointment is contingent upon successful completion of the academic program in which you are currently enrolled, and maintenance of the level of academic performance that was part of the basis for your acceptance. A final transcript of your grades must be forwarded to this office as soon as your school year ends.

You will be receiving additional information concerning summer programs, combined-degree programs, and other topics of interest as the year progresses. I and others at the medical school will try to keep you well informed of all important or interesting topics.

On behalf of the students, faculty, and administration at Tulane, I bid you a most enthusiastic welcome. If I can be of service to you in any way, please feel free to call upon me.

Sincerely yours.

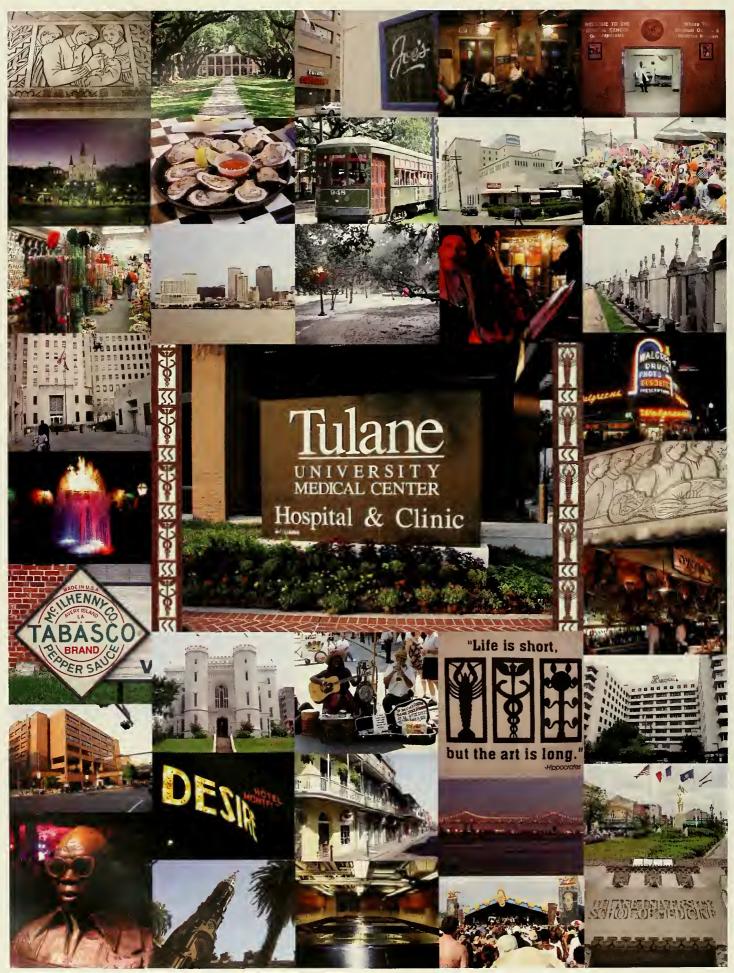

Joseph C. Pisano, Ph.D.

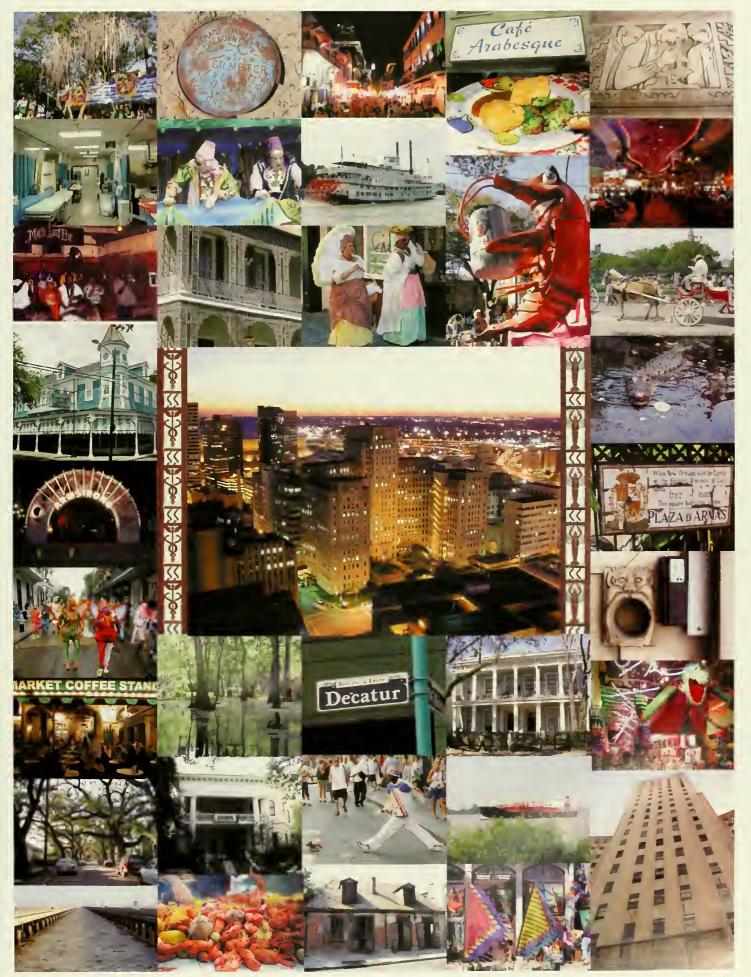

Associate Dean

JCP/kj

THE OATH OF HIPPOCRATES

I swear by Apollo, the physician, and Aesculapius, and Health and All-Heal, and by God and by whatever I hold most sacred, that, according to my ability and judgment, I will keep this Oath and this stipulation—I will look upon those who shall have taught me this Art even as one of my parents. I will share my substance with them, and I will supply their necessities if they be in need. I will regard their offspring in the same footing as my own brethren, and I will teach them this Art, if they shall wish to learn it, without fee or covenant. I will impart a knowledge of the Art by precept, by lecture and by every mode of teaching not only to my own children but to the children of those who have taught me, and to disciples bound by covenant and oath, according to the Law of Medicine, but to none other. The regimen I adopt shall be for the benefit of my patients according to my ability and judgment and I will abstain from whatever is deleterious and mischievous. I will seek to inform my patients fully about their illness and prognosis, and will always remember that the final decision regarding their own life rests with the patient. I will regard my patients always as fellow human beings and will do everything possible to preserve their dignity. With purity and with holiness I will pass my life and practice my Art. Whatsoever things I see or hear concerning the life of men in my attendance, on the sick or even apart therefrom, which ought not to be noised abroad, I will keep silence thereon, counting such things to be sacred secrets. While I continue to keep this Oath unviolated, may it be granted to me to enjoy life and the practice of the Art, respected by all men, in all times. But should I trespass and violate this Oath, may the reverse be my lot.

Dr. Elizabeth Crabtree

Elizabeth Crabtree-Hartman, MD, is Assistant Professor of Neurology and an Associate Director of the Neurology Residency Training Program at Tulane University Health Sciences Center. She obtained her medical degree at Tulane and then completed her neurology residency training at UCLA Medical Center. She returned to Tulane for her Neurobehavioral Fellowship with Dr. Anne L. Foundas. Her research interests include neurologic underpinnings of psychiatric symptomatology and subcortical neurobehavioral syndromes. She was the recipient of the 2004 Owl Club Award for Best Attending in the Section of Neurology as chosen by students of the class of 2005.

Elma Ireland LeDoux, MD, FACC, is an Associate Professor of Medicine at Tulane University School of Medcine. She also serves as Director of Medical Student Programs in the Department of Medicine and coordinates the longitudinal curriculum in electrocardiography and cardiovascular disease. Dr. LeDoux is a Fellow of the American College of Cardiology and a member of AOA and Clerkship Directors in Internal Medicine. She serves as Attending Staff at VA Medical Center in New Orleans and has won numerous teaching awards since joining the faculty in 1996. A graduate of Tulane Medical School, Dr. LeDoux is a perennial favorite among clinical instructors and holds the record for the most Owl Club Awards over the course of her tenure.

T-Wave Staff

A sincere thanks to all our classmates who contributed to the yearbook.

A very special thank you to Pat Schuessler for her dedication to the yearbook,
Patrick Gaston & SARBA--the mosaic is awesome, Carl--our yearbook hero, and
Charlotte Steger for always willing to help us.

--Meredith Adams, Nicole Freehill, Asha Jayakrishnan, Julie Lippe, Ed McCoul, & Dené Wrenn

"On behalf of the TUSOM and the Class of 2005, we would like to give a big THUMBS UP to the indefatiguable staff of the 2005 T-Wave Yearbook!"

David Benson

A dream fulfilled, as your heart turns twenty seven. Follow your heart and your dreams, and make the most of what God has given. Congratulations. With Love, Mom and Dad

Jennifer Baars

Dr. Jennifer,

You have always combined intelligence, determination, integrity, and pride with beauty, grace, humor, thoughtfulness, empathy, and love. These qualities along with your deep sense of family and friendship will forever carry you far. Know that "the families" return your love and are so proud of you. Congratulations!

With all our love, Mom and Dad

Jared Berkowitz

Way back when it all began, we knew you'd be a special man. We thought baseball would be your game but medicine will bring you fame. A prouder family there could never be, our love and devotion is endless to thee. Congratulations!

All our love, Mom, Dad, and Grant

Brian Banker

Brian,

We have always been proud of who you areyour character, values, and your personal achievements. But we are especially proud of your choice to become a primary care physician-there's no higher calling in medicine.

Love. Mom & Dad

McKay Bateman

McKay (A.K.A. Daddy),
We consider ourselves two very

lucky gals to have you! Medical school has been a great adventure and we're glad to have shared this experience with you. We are so proud of you and excitedly anticipate the road ahead.

Wilson Altmeyer

WILSON,
DAD AND I ARE SO PROUD
OF YOUR HARD WORK. YOU
HAVE MADE WISE CHOICES,
I.E. MISS MARY. WE WISH
YOUA WONDERFUL CAREER
IN MEDICINE.

Nicole DeSimone

Nicole.

Congratulations. We are very proud of you. Your great achievement however is still surpassed by your humility and kindness to others. You are a most wonderful daughter, wife, and friend. In the coming stages of life remember that we will always be there for you.

We love you, Dad, Mom, Mark , Michelle, and Michael

Dominique Cosco

It is with our love, your courage, confidence, and determination that you have reached the goal you have desired. We celebrate with you! "Go confidently in the direction or your dreams! Livethelife you've imagined." -Thoreau

Love, Dad, Mom, and Brianne

Erin Coakley

ERIN:

WHENYOUFIRSTMENTIONED MEDICAL SCHOOL GRADUATION SEFMED SO FAR AWAY. BUT THROUGH PERSEVERANCE. HARD WORK, GOOD LUCK AND YOUR DOG BELLA, YOU MADE IT. WE KNOW YOU WILL BE A GREAT DOCTOR. WE COULD NOT BE MORE PROUD. MOM. DAD. KEVIN, JEN, AND LAUREN

Michael Freehill

If one could make up a script for this chapter of your life, it couldn t be finer: from living in New Orleans, and the terrific Tulane experience with fine faculty and fabulous friends, to your wonderful bride. Our boy grew up to be "a man for all seasons." We reso proud and happy for you. Our cup runneth over.

Mom and Dad

Cerise Bush

Congratulations Reesie!

It doesn't seem possible that you're graduating. If we close our eyes we can still see that sweet child that everyone adored. Now you're a woman, still just as sweet, who we greatly admire for your focused determination in achieving this honor.

Love you! Mama and Dad

Jessica Gandalak

Jessica, we were blessed to have you. You smiled from the day you were born. You have always made people smile through your remarkable gifts of humor, intellect, curiosity, modesty, and compassion. The essence of Jessica is your genuine caring about others. You will be an extraordinary healer. We love you!

Shaun Donegan

Dear Shaun:

You are now a Medical School graduate. What a long journey it has been; what obstacles you have encountered and overcome to reach your life-long goal. Our hearts are full of love and happiness, and pride in your strength and character. Mom, Dad, Meagan, Ryan, Molly, and Claire

Patrick Farley

CONGRATULATIONS! We are very proud of you! We have always admired your intelligence and dedication. We know you have overcome many obstacles to reach this goal. We are so happy for you and we are certain that the best is yet to come. Love, Mom & Dad

David Ferachi

David...So, you are a doctor! Congratulations on a job well done. You will have success as a physician if you treat your patients with honesty, integrity, dignity, and compassion. Best of luck in your future endeavors. David, you honor me by following in my footsteps as an orthopedic surgeon. Love, Dad

Bryan Fritz

Believe...in yourself and make the world a healthier place.

Respect...everyone and bring humor to your profession.

You...should enjoy life and never take life too seriously.

Answer...the call to selflessness.

Now...shine with your God given talents and our love.

Your Very Proud Family

Nicole Freehill

Congratulations on achieving your goals. You reached for the starts and captured the not only the stars, but the sun and the moon as well. I am so very proud of you! Love, Mom

Jennifer Gurski

Jennifer,
The time has gone by too fast.
From baby, child, and young woman to wife and doctor! We are proud of your strength of purpose and determination to make this day a reality.

Love Dad Mom Paul S-Lauren

Love, Dad, Mom, Paul & Lauren

Prashant Gupta

Prashant,

The day you were born our world lighted up and that is why we affectionately call you "Sonny Sunshine." You were a very cute and likeable child. We are very proud of your academic and social accomplishments. You are going to be a great doctor. "Good luck" son. Son, sky is the limit, keep going. Life is beautiful, enjoy it. We love you very much and will always be there for you.

Love, Mom and Dad

Kevin Guillory

Congratulations Kevin on a job well done! Through persistence, determination, and prayer you made it. We are proud of you and wish you much success in the future. May God guide your mind, hands, and heart and spirit in the treatment of your patients.

Love, Momma, (Daddy) and family

Fasih Hameed

Happiness lies in the joy of achievement and the thrill of the creative e ort

F. D. Roosevelt

With dogged determination, sailing in sometimes choppy seas, you've arrived. Congratulations, Dr. Fasih! We are extremely proud that you are our son and brother. Go, touch some more lives.

Love, Mom, Dad, Faudia, Feroz, and Farah

Asha Jayakrishnan

CONGRATULATIONS ASHA. WE ARE SO PROUD OF YOUR MANY ACCOMPLISHMENTS AND YOUR CREATIVE TALENTS. WE LOVE YOU SO MUCH. MAY GOD BLESS YOU AND GUIDE YOU AS YOU EMBARK ON YOUR MEDICAL CAREER.

Love, Mom & Dad, Nina, and Jay

Kristin Janson

Kristin,

Your graduation is truly a special time in your life and in ours, a time to celebrate the accomplishment of a dream you have worked so hard to realize. You are very compassionate, very gifted, and an absolutely amazing person. Happy graduation. We love you.

Mom, Dad, and Carly

Derek Isenberg

You've come a long way, baby! Now, go forth and heal!

With I, hak...m

Colleen Johnson

Colleen,
We are so proud of you! You
have wanted to be a doctor for
as long as we can remember.
You have worked hard over the
last eight years and now you
are a doctor. We Love You!!
Mom and Dad Daze

Cecily Jones

Every father is proud of his children and to have a daughter as determined and dedicated is a blessing. Congratulations Poopsie. God has made you special and has blessed you with great talents. In all thy ways acknowledge Him and He shall direct thy path.

Love, Mom and Dad

Brian Lewis

Congratulations! We are very proud of you. You are our family's first doctor. Your consistent e ort and hard work are examples of the can do attitude you have maintained all of your life. We love you very much, and we are so glad that you are our son.

Dad and Mom

Julie Lippe

From buffied tomboy to big sister to aspiring doctor, you have always been and continue to be a phenomenal daughter. We are proud of all you are and of all you choose to be. Know that you are one "to whom much has been given." You are blessed with health, wealth and happiness.

Health to offer others through your skills. Wealth of knowledge to share with all who seek it. Happiness to sprinkle about with your infectious

smile.

Your wisdom, ambition, motivation, compassion, and ingenuity continually amaze us.
We love you. Momand Dad

Cara Kawahara

Our Cara,
Girls' Day 1980 held no hint of your
accomplishments. You continue to
surprise and amaze us with your
determination, persistence, and ability
to meet all challenges.
Love and Congratulations!
Mom, Dad, & the Family.
A goal accomplished...the next
adventure begins!

Natalie Mahieu

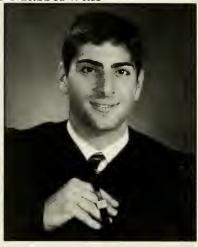

You go Gnat! Whether Gnat, Nat, or Natalie—You've made family history! We are so proud of and so happy for YOU!

Much love from your great big family.

Edward McCoul

I am, we are, so very happy 4U. We believe in you, have such faith in you. Proud of you and the persistence/talent/integrityyou'veshown. Noeasy accomplishment, I know. UR going 2B an outstanding doctor, Eddie. And so, heartfelt Congratulations and Love, Mommy, David, and Daddy

Nader Masserwah

You began this journey by declaring "ceaseless pursuit" is your contribution to medicine. Congratulations on climbing another mountain! If you should tire during your journey, know that we will be there with endless love and support, to help you back on the road.

Love, Dad & Mom, Anthony, and Lori

Joseph Matthews

"Almighty God! Thou hast chosen in Thy mercy to watch over the life and death of Thy creatures. I now apply myself to my profession. Support me in this great task so that it may benefit mankind, for without Thy help not even the least thing will succeed."

David Melton

Arrows...and clay dinosaurs, exotic menageries, batting practice, Fur Elise, fly fishing, tree stands, South African tribal ceremonies, shark cages, and medical school—all implorations to dream what is possible. Keep believing, and keep exploring. Thank you for giving us this wonderful moment to share.

Love, Mom & Dad

Jeffrey Nadig

Congratulations Jeff!
Remember the thrill of the White Coat
Ceremony-medical school begins. Now
you are graduating! We are so proud
of you!! Your future is exciting and
challenging. We know you will be very
successful.

Much love to you, Katie and Ella, Mom, Dad, and your entire family.

Adam Nicholson

Wow! You've made it to the end of a long road, and you're about to embark on a wonderful new journey. Keep up the things that got you to this day-your honesty, your sense of fun, your empathetic spirit, and unending drive to meet every challenge. Congratulations!

Luke McDonald

Congratulations, Luke, and to the entire Class of 2005! May the healing hands, skill, caring, and compassion of the Tulane Med Class of '05 have a positive impact that is felt in all the corners of the world for generations to come.

With much love, Dad, Mom, Laura. Gordon, and Jimbo

Jonathan Nass

CONGRATULATIONS JONATHAN AND MELISSA! LIFE'S A JOURNEY. AS ONE ADVENTURE ENDS. ANOTHER BEGINS. GOOD LUCK ON THE NEXT LEG OF THE TRIP.

LOVE, MOM AND DAD, LESLIE, LANCE, LUKE, JARED, & CARRIE

Charlie Popkin

All of us take great pride in your outstanding record of achievement and in the dedication, caring, and warmth that are your very fiber. Congratulations, doctor...we love you! Mom, Dad, Sara & Lee

Jason Oaks

Jason. Your family is exceptionally proud that you are our son and brother. Keep learning and teaching as you move forward in your career. We know many will benefit from your knowledge and abilities. Our congratulations to you! Love, Father, Mother and Sara

Rahul Prasankumar

Congratulations Dr. Rahul Prasankumar! You have always achieved anything you set your mind to, from playing the drums to joining the football team, always following your own path. We remain very proud of you and wish you nothing but the best always! Love, Dad, Mom, Rohit, Anu, and Sona

Viengsouk Phommachann

Viengsouk,

Twenty-five years ago we were uncertain of our future. You have made great sacrifices and overcome many obstacles to be where you are now. We are proud of who you have become and the accomplishments you have achieved. Congratulations! We love you! Love, Mom, Dad, and Ruby

David Robertson

David, Congratulations on becoming a Doctor. Once again you have made us proud of the wonderful person you have become. Thank you for being such a great son. Love, Mom, Dad & Amy

Ben Salter

Ben:

Your future patients will benefit from your dedication, hard work, intelligence; and as important, your warm, kind and thoughtful spirit. May the privilege of caring for others bring you joy, as it did for your Dad. We love you very much.

Mom, Jason, Karen, Terrill, Nana and Papa,

Grandma and Grandpa

Tristan Sevdy

Jeremiah 29:11 "I alone know the plans I have for you, plans to bring you prosperity and not disaster, plans to bring about the future you hope for."

Our Lord Jesus is faithful and trustworthy. We praise Jesus for our answered prayers for you Tristan.

LOVE YOU, Shannon and Zach

Mark Reddick

My precious son, Mark. I couldn't be more proud as your mother. It was tough growing up, but just look at how you handled all the obstacles in your way. You will always be my little one. You've grown up to be a fine young man and successful too. How much more could a mother want? I hope you have achieved your goals. Graduating? Not preschool, not elementary, not even high school, but Medical School? Wow. I love you, Mom.

Ryan Shannon

You left home a boy of eighteen determined to find yourself. You stand proudly as a doctor with a beautiful wife, daughter, and a vision of your future. We are all very proud of you Ryan. We cannot wait until your residency is completed and you settle in Southern California to reap your rewards.

Nikki Singh

WELL DONE, NIKKI!
YOUR HARD WORK AND
PERSEVERANCE HAVE PAID OFF...
PITAJI WOULD BE PROUD THAT
ONE OF HIS GRANDCHILDREN
FULFILLED HIS WISH AND BECAME A
PHYSICIAN.
WITH LOVE MOM. DAD. ANITA

WITH LOVE, MOM, DAD, ANITA, AND GEETA

Terri Stillwell

We have watched you grow in beauty and wisdom. We are proud of all that you have accomplished; and, we know that you will always be there to help those in need.

May it be said: When the sun sets on your life, you made a di erence.

Lisa Swanson

"Medicine is the best of all professions, the most hopeful."
William J. Mayo

The above message is sent with love from Mom and Dad.

Ariane Stevens and Candace Robinson

Ariane and Candace,

Congratulations on successfully completing another wonderful chapter in your lives. As you embark upon new horizons as doctors, I know you will continue to use your talents with exceptional competence and compassion. You have always been a tremendous source of pride and joy and I thank you for being my blessings.

Much success and abundant love, Mama

Amy Vaughn

Dear Amy,

We are so proud to see your childhood dream become reality. And we know that you will be an amazing doctor to many, just as you have been a wonderful daughter, sister, aunt, granddaughter, and frequently family doctor to all of us!

Love, Your Family

Heather Taher

Medicine is a science, but the practice of medicine is an Art. May all your hard work and perseverance bring you happiness and success. You are God's Gift and our joy. No one could be more proud than we are.

Love, Baba and Mom

Leah Ustas

To Leah:

Congratulations on a job well done! Always stay inquisitive, inspired, and dedicated. We know you'll continue to succeed in all your endeavors. You make us proud!

Love, Mom, Dad, and Scott

André Viator

Congratulations André, (Andy),(Dre). Stephen Viator. It has been a long road, but you have made it. You were a special little boy and now, a special young man. We love you very much, and wish you all the happiness and rewards that life has to offer. Love, Mom and Dad

Dené Wrenn

Dr. Dené Wrenn We Always Knew You Would Rise to the Top! Love, Daddy & Your Family

Christopher Willoughby

Life is a Journey.
The Memories We Share are There to Borrow.

BAUSCH & LOMB

MAKE IT TO GOAL, MAKE IT CRESTOR

In getting patients to LDL-C goal

The leading statins went head-to-head

WHO WON?

As an adjunct to diet

MORE PATIENTS reached updated LDL-C goal with CRESTOR at a low 10-mg dose

than atorvastatin 10 mg, simvastatin 20 mg, and pravastatin 40 mg *1,2

*In all risk categories combined, 68% of patients treated with CRESTOR 10 mg achieved updated LDL-C goal vs 50% with atorvastatin 10 mg, 56% with simvastatin 20 mg, and 50% with pravastatin 40 mg (P<.001). Comparisons shown are with the most commonly prescribed doses.

LDL-C goal was <160 mg/dL, <130 mg/dL, <100 mg/dL, or <70 mg/dL, depending on individual risk factors.² Adapted from the STELLAR trial, a 15-arm trial comparing the efficacy and safety of CRESTOR with atorvastatin, simvastatin, and pravastatin in 2240 patients with Type Ila/Ilb dyslipidemia.⁴

PROVEN SAFETY similar to other leading statins⁵

 In preapproval clinical trials and postmarketing experience, CRESTOR has demonstrated a safety profile consistent with other currently marketed statins⁵⁷

Important Safety Information

- CRESTOR is indicated as an adjunct to diet to reduce elevated total-C, LDL-C, ApoB, non-HDL-C, and TG levels and to increase HDL-C in patients with primary hypercholesterolemia (heterozygous familial and nonfamilial) and mixed dyslipidemia. The effect of CRESTOR on cardiovascular morbidity and mortality has not been determined; long-term outcome studies are currently under way
- CRESTOR is contraindicated in patients with active liver disease or with unexplained persistent elevations of serum transaminases, in women who are or may become pregnant, and in nursing mothers
- It is recommended that liver function tests be performed before and at 12 weeks following both the initiation of therapy and any elevation of dose, and periodically (eg, semiannually) thereafter
- Patients should be advised to promptly report unexplained muscle pain, tenderness, or weakness, particularly if accompanied by malaise or fever. Discontinue drug if markedly elevated CK levels occur or myopathy is diagnosed or suspected
- Adverse reactions were usually mild and transient; the most frequent adverse events thought to be related to CRESTOR were myalgia (3.3%), constipation (1.4%), asthenia (1.3%), abdominal pain (1.3%), and nausea (1.3%).

Please see brief summory of full Prescribing Information on reverse side of this odvertisement.

BRIEF SUMMARY: For full Prescribing Information, see package insert.

INDICATIONS AND USAGE CRESTOR is indicated. It as an adjunct to det to reduce elevated total-6, L01-6, ApoB, nonHOL-6, and TG levals and to increasa HOL-6 in patients with primary hyperbolishesterolmia (heterorygous familial) and mored dyslip demia (Fredrickson Type IIa and IIb): 2 as an adjunct to diet for the treatment of patients with elevated serum TG levals (Fredrickson Type IV); 3 to reduce L01-6, Lotal-6, and ApoB in patients with homozygous familial hyperholesterolmia an adjunct to other lipid-fowering treatments (e.g., L01 Aparesess) or if such treatments are

CONTRAINDICATIONS CRESTOR is contraindicated in patients with a known hypersensistanty to any component of this product. Rosuvarsiation is contraindicated in patients with active fiver desease or with unexplained persistent elevations of section patients with active fiver desease or with unexplained persistent elevations of section transaminases (see WARNINGS, Liver Enzymes). Preginancy and Loctofion Atherosclerosis is a chronic process and discontinuation of lipid-lowering drugs during prepanary should have little limpact on the outcome of long-term therapy of primary hypercholesterolema. Cho'esterol and other products of cholesterol biosynthesis are essential components for letal development (including synthesis of schoolsterol biosynthesis and possibly the synthesis of other biologically active substances derived from cholesterol, they may cause fetal harm when administered to prepanary and in nuising mothers. ROSUMSTATIN SHOULD BE ADMINISTEREO TO WOMEN OF CHILDSEARING AGE ONLY WHEN SUCH PATIENTS ARE INCHILLY JUNISLEY. TO CONCEINE AND HAVE SEEN INFORMED OF THE POTENTIAL HAZAROS. If the patient becomes prepanar while taking this drug, Iherapy should be discontinued immediately and the patient apprised of the patients hazare to the fetus.

WARNINGS Liver Enzymes HMG-CoA reductase inhibitors, like some other lipid-lowering Inerapies, have been associated with biochemical abnormalities of liver function. The incidence of persistent elevations (>3 times the upper limit of normal [ULM] occurring on 2 or more consecutive occasions) in serum transeminases in fixed dose studies was 0.4, 0, 0, and 0.1% in patients who received resurvastatin 5, 10, 20, and 40 mg, respectively. In most cases, the elevations were transient and resolved or improved on continued therapy or after a bind interruption in therapy. There were two cases of jaundice, for which a relationship to rosuvastatin therapy could not be deter-mined, which resolved after discontinuation of therapy. There were no cases of liver failure or irreversible liver disease in these trials. It is recommended that liver function lests be performed before and at 12 weeks following both the initiation of therapy and any elevation of dose, and periodically (e.g., semianually) thereafter. Liver enzyme changes penerally occur in the list 3 months of treatment with rosuvastatin. Patients who develop increased transaminase levels should be monitored until the abnormalities have resolved. Should an increase in ALT or AST of >3 times ULN persist, reduction of dose or withdrawal of rosuvastatin is recommended. Rosuvastatin should be used with caution in patients who consume substantial quantities of alcohol and/or have a history of liver disease (see CLINICAL PHARMACOLOGY, Special Populations, Hepatic Insufficiency). Active fiver disease or unexplained persistent transaminase elevations are contraindications to the use of rosuvastatin (see CONTRAINDICATIONS).

Myopothy/Rhobdomyolysis Rare cases of rhabdomyolysis with acute renal failure secondary to myglobinuria have been reported with rosuvestalin and with other drugs in this class. Uncompicated mysloja has been reported in rosuvastatin-reated patients (see ADVERSE REACTIONS). Creatine kinase (CK) elevations (>10 times upper limit of normal) occurred in 0.2% to 0.4% of patients taking rosuvastatin at doses of up to 40 mg in clinical studies. Treatment-related myopathy, defined as muscle aches or muscle weakness in conjunction with increases in CK values >10 limes upper limit of normal, was reported in up to 0.1% of patients taking rosuvastatin doses of up to 40 mg in clinical studies. Rare cases of irrabdomyolysis were seen with higher than recom-mended doses (80 mg) of rosuvastatin in clinical trials. Factors that may predispose patients to myopathy with HMG-CoA reductase inhibitors include advanced age (>65 years), hypothyroidism, and renal insufficiency. The incidence of myopathy increased at doses of rosuvastatin above the recommended dosage range. Consequently Rosuvastatin should be prescribed with caution in patients with predisposing factor:
for myopathy, such as, renal impairment (see DOSAGE AND ADMINISTRATION) advanced age, and hypothyroldism. 2. Patients should be advised to promptly report unexplained muscle pain, lenderness, or weakness, particularly if accompanied by malaise or lever. Rosuvastatin therapy should be discontinued if markedly elevated CK Needs occur or myopathy is diagnosed or suspected. 3. The risk of myopathy during treatment with resunsation may be increased with concurrent administration of other ligid-lowering therapes or cyclosporine, (see CLINICAL PHARMACOLOGY, Orug Interactions, PRECAUTIONS, Drug Interactions, and DOSAGE AND ADMINISTRATION). The benefit of further alterations in light levels by the combined use of resuvestatin with librates or niasin should be carefully weighed against the potential risks of this combination. Combination therapy with resuvastatin and gentifibratil should generally be avoided (See DOSAGE AND ADMINISTRATION and PRECAUTIONS, Orug Interactions). 4 The risk of myogathy during treatment with resuvastatin may be increased in circumstances which increase rosuvastatin drug levels (see CLINICAL PHARMACOLOGY, Special Populations, Race and Renal insulticiency, and PRECAUTIONS, General). Rosuvasiatin therapy should also be temporarily withheld in any patient with en acute, serious condition suggestive of myopathy or predisposing to the development of renal failure secondary to rhabdomyolysis (e.g., sepsis, hypotension, major surgery, trauma, savere metabalic, endocrine, and electrolyte disorders, or alled seizures)

PRECAUTIONS General Before instituting therapy with rosuvastatin, an attempt should be made to control hyperchalesterolima with appropriate diet and exercise, weight reduction in obese patients, and treatment of underlying medical production in obese patients, and treatment of underlying medical productions (See INDICATIONS AND USAGE). Administration of rosuvastatin 20 mg to patients with severe renal imparment (CL_{et} < 30 mU/miv1.73 m²) resulted in a 3-fold increase in plasma concentrations of rosuvastatin compared with healthy volunteers (See WARNINGS, Myopathy/Rhabdomyolysis and DOSAGE ANO ADMINISTRATION). Pharmacoknetic studies show an approximate 2-fold elevation in median exposure in Japanese subjects residing in Japan and in Chinese subjects residing in Singapore compared with Caucasians residing in North America and Europe. The contribution of environmental and generic lactors to the difference observed has not been determined However, these increases should be considered when max np rosuvastatin dosing decisions for patients of Japanese and Chinese ancestry (See WARNINGS, Myopathy) Rhabdomyolysis; CL NICAL PHARMACOLOGY, Special Regulations, Race.) Information for Protients Patients should be advised to report promptly unexplained muscle pain, tenderness, or weakness, particularly it accomparate by malagine relieve. When taking rosuvastatin with an alluminum and magnesium hydroxide combination antacid, the anatical should be befined telest. Planes after rosuvastatin administration (see CLINICAL PHARMACOLOGY, Orug Interactions) Laborolory Tests In the rosuvastatin crimical trial program, disptick-positive proteinura and microscope lever. When taking rosuvastatin or somparator statins, though the was generally transent and was not essociated with worspaning renal lunction. Although the chinical significance of this linding is requested in patients taking rosuvastatin or omparator statins, though the was generally transent and was not essociated with worspaning renal lunction. Although the chinical signif

increases are considered to be clinically significant and require special consideration in the dosing of rosuvastatin to patients saving concomitant cyclosporine (see WARN NGS, Mypoathy/Rhaddomychysis, and OOSAGE AND ADMINISTRATION). Wartaint, Oosadministration of rosuvastatin to patients on stable wartaint interagy resulted in clinically significant rises in INR (4-), baseline 2-3), in patients taking countain anticopularits and rosuvastatin concomitantly. INR should be determined before starting rosuvastatin and frequently enough during early therapy to ensure that no significant alteration of INR occurs. One a stable INR time has been documented, INR can be interested. INR can be moderated at the intervals usually recommended for patients on countain ant coagularits. If he dose of rosuvastatin is changed, the same procedure should be repeated Rosuvastatin therapy has not been associated with bleeding or with changes in It in patients not taking anticoagularits. Gentifierable Coadministration of a single rosuvastatin doss to healthy volunteers on gentifierable Coadministration on a single rosuvastatin doss to healthy volunteers on gentifierable (200 mg histoed doily) resulted in a 2-2- and 1,9-fold, respectively, lincrease in mean Cimax and mean AUC of rosuvastatin (see DOSAGE AND ADMINISTRATION). Endocrine Function Although clinical studies have shown that rosuvastatin alone does not reduce besail plasma contisol concentration or impair adronal reserve, caution should be beconsed if any HMC-Coal reductase inhibitor or other agent used to lower cholesterol levels is administered concentration or impair adronal reserve, caution should be beconsed in any HMC-Coal reductase inhibitor or other agent used to lower cholesterol levels is administered concomitantly with drugs that may decrease the levels or administered option and the period administered option and perivascular spaces, have been observed in dogs treated with several other members of this drug class. A chemically similar drug in this class produced do

human exposure at 40 mg/day based on AUC compansons). Catarads were seen in dogs treated for 12 weeks by oral gavage at 30 mg/kg/day (system c exposures 60 times the human exposure at 40 mg/day based on AUC compansons). Refinal dysplasia and retinal loss were seen in dogs treated for 4 weeks by oral gavage at 90 mg/kg/day (systemic exposures 100 times the human exposure at 40 mg/day based on AUC). Ooses <30 mg/kg/day (systemic exposures 460 times the human exposure at 40 mg/day based on AUC). Ooses and mg/kg/day (systemic exposures 460 times the human exposure at 40 mg/day based on AUC). Ooses (systemic exposures 460 times the human exposure at 40 mg/day based on AUC). Ooses (systemic exposures 460 times the human exposure at 40 mg/day based on AUC). Ooses (systemic exposures 460 times the human exposure) at 40 mg/day times the human exposure at 40 mg/day based on AUC). Ooses (systemic exposures 460 times the human exposure) at 40 mg/day based on AUC). Ooses (systemic exposures 40 times the human exposure) at 60 times the human exposure at 60 times the human exposure at 60 mg/day based on AUC). Ooses (systemic exposures 40 mg/day based on AUC). Ooses (systemic Corcinogenesis, Mutagenesis, Impairment of Ferhility In a 104-week carcinogenicity study in rats at doselevels of 2, 20, 60, or 80 mg/kg/day by rad garage, the incidence of uterine stronal polyps was sprillicarly increased in temperate 80 mg/kg/day at systemic exposure 20 times the human exposure at 40 mg/day based on millionidations. AUC, Increased incidence of polyps was not seen at lower doses. In a 107-week carcinoepicinly study in mice given 10, 60, 200 mg/kg/day by ong gayang, an increased incidence of hepatocellular adenoma/caronoma was observed at 200 mg/kg/day at systemic exposures 20 times human exposure at 40 mg/day besed on AUC. An increased incidence of hepatocellular tumors was not seen at lower doses. Rosundstatin was not mulagenic or clastopenic with or without metabolic activation in the Ames test with Salmonella typhimurium and Escherichia coli, the mouse lymphoma assay, and the chro-mosomal agerration assay in Chinese hamster lung cells. Rosuvastatin was regarive in the ray vom onuse microrucleus test. In rat Farliniy studies with oral gavage doses of 5, 15, 50 mg/kg/day, males were treated for 9 weeks prior to and throughout mating and 15. 50 mg/kg/day, males were treated for 9 weeks prior to and throughout mating and temales were treated 2 weeks prior to mating and throughout mating until gestation day 7. No adverse elfect on fertility was observed at 50 mg/kg/day (systeme exposures up to 10 times humen exposure at 40 mg/kg/day for one month, spermatidic grant cells were seen. Spermatidic giant cells were seen. Spermatidic giant cells were observed in monkeys after 6-month meatment at 30 mg/kg/day in addition to vacuolation of seminiterous tubular epithetium. Exposures in the dog were 20 times and in the monkey 10 times human exposure at 40 mg/day based on body surface area comparisons. Similar lindings have been seen with other drugs in this class. **Pregnancy** Preparaty Category X See CONTRAINDICATIONS. Rosuvastatin may cause if stell harm when administered to a pregnant woman. Rosuvastatin is contraindicated in women who are or may become pregnant. Safety in pregnant women has not been established. There are no adequate and well-controlled studies of rossess the beckenta and is studies of rosuvastatin in pregnant women. Rosuvastatin crosses the placenta and is found in fetal tissue and amniotic fluid et 3% and 29%, respectively, of the maternal plasma concentration following a single 25 mg/kg oral gavage dose on gestation day 16 in rats. A higher fetal tissue distribution (25% maternal plasma concentration) was observed in rabbits after a single oral gavage does of 1 mg/kg on gestation day 18. If this drup is earministered to a woman with reproductive potential, the patient should be apprised of the potential hazard to a fetus. In famale rats given oral gazage does of 5, 15, 50 mg/kg/day rossivastatin before mating and confining through day 7 postcorius results in decreased fetal body weight (temale pups) and debyed ossilication at the high dose (systemic exposures 10 times human exposure at 40 mg/day based on AUC companisons). In pregnant rats given oral gavage doses of 2, 20, 50 mg/kg/day from gastation day 7 through lactation day 21 (weaning), decreased pup survival occurred in groups given 50 mg/kg/day, systemic exposures ≥12 times human exposure at of Umg/Gu/ based on body surface area companisons. In preparant rabbits given or a quarge doses of 0.3, 1, 3 mg/kg/day from gestahon day 6 to lactation day 18 (waaning), exposures equivalent to human exposure at 40 mg/gu/ based on body surface area compansons, decreased felal vahur yand maternal mortality was observed. Resursastatin was not teratogenic in rats at <25 mg/kg/day or in rabbits <3 mg/kg/day (systemic exporeasons related to human exposure at 40 my/day based on AUC or body surface comparison, respectively). Nursing Mathers II is not known whether rosuvastalm is excreted in human milic. Studies in lacating rats have compositated that rosuvastalm is secreted into breast mike at levels 3 limes hipper than that obtained in the para-lot/owing oral gavage dos mg. Because many drugs are excreted in human milk and because of the potential for serious adverse reactions in nursing inlants from rosuva-statum, a decision should be made whether to discontinue nursing or administration of stall in taking into account the importance of the drug to the factating woman resurvisian reading into account the importance of the long to the lectating woman. Pedicatric Use The satisfy and effectiveness in pediating patients have not been estab-lished. Treatment experience with rosurvastatin in a pediating population is limited to 8 patients with homogropous PH. Nore of these patients was below 8 years of age. Ceriatric Use of the 10275 patients in chimal studies with rosurvasion. 3.159 (31%) were 65 years and older, and 698 (6.8%) were 75 years and older. The overall frequency of adversa events and types of adversa events were summar in patients above and below 65 years of age. (See WARNINGS, Myopathy/Rhabdomyo)sis.) The efficacy of rosuvastatin in the genating population (#65 years of age) was comparable to the efficacy observed in the non-elderty.

ADVERSE REACTIONS Rosunzistan is generally well toerated. Adverse reactions have usually been mild and train end in dirucal studies of 10,275 generals. 37% were discontinued due to adverse expensions articulate its recoverable most frequent adverse events thought to be realled to represent his weer myllags, constpation, astherial, accountable and inspecific Clinical Adverse Expensions. Adverse expensioners, regardless of causality assessment, reported in a2% of patients in placebo-controlled clinical studies of rosunzistatin are shown in Table 1; descontinuations due to adverse events in these studies of to 12 weeks duration occurred in 3% of patients on convexation and 5% of patients on convexation and 5% of patients on recoverable of the properties of recoverable and 5% of patients on recoverable and 5% of pa

Table 1. Adverse Events in Placeto-Controlled Studies

	Rosuvastatin	Placeto
Adverse event	1:744	N=382

In addition, the following adverse events were reported: regardless of causality assessment, in a 1% of 10.275 patients treated with rosurvastian in chimal studies. The events in tables occurred in a 2% of 10.275 patients treated with rosurvastian in chimal studies. The events in tables occurred in a 2% of these patients. Body as a Whole: Advortional pain accordantal injury, chest pain, infection, pain, peking pain, and neck pain. Cardiovasculer System: Hypertension, angina pectoris, viasodilation, and pelipidation. Objective System: Hypertension, angina pectoris, viasodilation, and pelipidation. Objective eachymosis. Melabotic and Nutritional Disorders: Peripheral edems. Musculosisaletal System: Arthritis, arthralpia, and pathological Iriature. Nervius System: Disconsistion, paresthesia, depression, anvery, vettings, and neuropa. Respiratory System: Bronchisto, obugh increased, dispense, proteining, in the rosurvastant clinical trial program, dipstick-positive proteininal and microscopic hematura were boserved among rosurvastant-related patients, predominanty in patients dosed above the recommended dose range (i.e., 33 mg), However, this finding was more frequent in patients taking rosurvastant Au mg, when compared to lower doses of rosurvastant occumpantor stating, though it was generally transer and and sent or associated with one comparator stating, though it was generally transer, in the rosurvastant clinical trial program, divingently one causality program, regardless of causality assessment, included armythma, hepatius, study program, regardless of causality assessment, included armythma, hepatius, hypersens tivity reactions (i.e., tace edema, timombocytopena, lexicoena, vescilidudious rash, unicara, and ang oceana), kidny la live, synoppe, mysthenia, mystiss, panceration, protopostant of overdose, in the event

OVERDOSAGE There is no specific treatment in the event of overdose. In the event of overdose, the patient should be treated symptomatically and supportive measures instituted as required. Hemodialysis does not significantly enhance clearance of resurvatation.

DOSAGE AND ADMINISTRATION The patient should be placed on a standard cholesterol-lowening diet before receiving CRESTOR and should contrue on his act during treatment. CRESTOR can be admiristered as a single dose at any time of day, with or without food. Hypercholesterolemio (Heterozygous Fomiliol and Nonfamiliol) and Mixed Dyslipidemio (Fredrickson Type III) and III) had dose range for CRESTOR is 5 to 4 ding once daily. Therepy with CRESTOR should be individualized according to goal of therapy and response. The usual recommended starting dose of CRESTOR is 10 mg once daily. In itation of therapy with 5 mg once daily may be considered for patients requiring less aggressive LDL-C reductions or who have predisposing factors for myopathy (see WARNINGS. Myopathy). Rhabdomyolysis, For patients with marked hyperholesterolemia (LDL-C > 190 mg/all) and aggressive lipid targets, a 20-mg starting dose may be considered. The 40-mg dose of CRESTOR should be reserved for those parients with ohave not achieved goal LDL-C and conformation of CRESTOR, lipid levels should be paralyzed within 21-d weeks and dosage abjustion accordingly Homozygous Formilial Hypercholesterolemia The recommended starting dose of CRESTOR is 20 mg once daily in patients with homozygous Formilial Hypercholesterolemia The recommended starting dose of CRESTOR is 20 mg once daily in patients with homozygous Formilial Hypercholesterolemia The recommended starting dose of CRESTOR is 20 mg once daily in patients taking cyclosporine, therapy should be limited to CRESTOR is mg once daily (see WaRNINGS. MyopathyRhabdomyohys. and PRECAUTIONS, Once Interactions). Concomitant Lipid-Lowering therapy The effect of CRESTOR is hould be immed to 10 mg interactions. Dosoge in Patients With Renol Insufficiency No modification of losage is necessary for patients with mird to moderate mail insufficiency No modification of losage is necessary for patients. With Renol Insufficiency No modification of CRESTOR should be started at 5 mg once daily and not no hemosulys.

Rx only

Dedication comes in many forms.

We understand how the dedication of one generation can benefit those that follow.

At Abbott, we're proud to provide products and services that help you deliver the best possible health care to the people of your community.

And we promise we will remain dedicated to our goal of improving health care for the generations that follow.

www.abbott.com

We are pleased to be recognized for our diversity.

We Innovate Healthcare

From Research to Real Life.

We all dream of doing big things.

Solving important problems.

Making a difference. Improving lives.

Transforming these dreams into reality requires ambition, creativity, and a company like ours to help put all the elements together.

Roche is a leader in preventing, diagnosing and treating disease, enhancing the quality of life for everyone. We invest almost \$2 billion a year in innovative research, and our capabilities combine traditional biomedical science with the latest advances in biotechnology, genetics and genomics. Our investment in research has led to the recent introductions of important new medicines for obesity and flu. And our current pipeline includes advances for treating cancer, osteoporosis and hepatitis C.

Few companies possess the global strength in both diagnostics and therapeutics that Roche enjoys. By forging closer links between diagnosis and treatment, we're leading the way to a new dimension in healthcare – individualized medicine. This approach identifies the best treatment for a specific individual.

And since we understand that every individual is unique, we strive to ensure a

diverse environment. Roche encourages creativity and embraces differences in talent, education, workstyle, lifestyle and culture.

Obesity, transplant medicine, diabetes, breast cancer, hepatitis, influenza and HIV – just some of the real life issues Roche is focusing on. And providing solutions for.

Visit our global website at www.roche.com or our U.S. website at www.rocheusa.com.

Takeda Pharmaceuticals North America, Inc. is creating opportunities to enhance patient care and provide:

- \bullet A comprehensive approach to research and development.
- Resources and services uniquely designed to meet your needs.
- Ongoing support for an evolving healthcare environment.

For more information about healthcare solutions that are uniquely Takeda, please call I-877-872-3700 or visit our website at www.tpna.com. We look forward to creating a partnership that helps you meet the challenges of healthcare now and in the future.
