Chapter Two

In his literary debut Lyly entered the field of feminine characterization as a misogynist. The attitude toward women in *Euphues: the Anatomy of Wit* is definitely negative. Lucilla, who serves as an approximation of a heroine, is best described by John Dover Wilson, who finds her "subject to a mild form of erotomania and... constitutionally fickle." However, characterization is hardly even attempted in *The Anatomy of Wit*, and it is difficult even to judge the temperament of Euphues himself. He and Philautus, his friend, are generally lifeless and wooden, and we may only differentiate between the two slightly, if at all. Euphues simply appears more reserved than Philautus, though equally as gullible in the face of Lucilla's vacillation.

From Lucilla's actions -- rejecting Philautus in favor of Euphues, then rejecting Euphues in favor of another -- we gain the greatest insight into her character. She is "constitutionally fickle," with little personality and as wit. Her fickleness seems curiously compulsive, as if it were an innate element of feminine nature. But this same characteristic

John Wilson, p. 71.
is the only characteristic which gives Lucilla color and importance. Her behavior, in a sense, is the principal motivating element of the plot. It draws Euphues to her and creates the rupture and inevitable reconciliation between Euphues and Philautus.

In addition, Lucilla - or, rather, Lucilla's behavior - is largely responsible for Euphues' Cooling-Carde for Philautus and all fond lovers, which is attached to The Anatomy of Wit as a sort of postscript. The Cooling-Carde is Lyly's own contribution to the literature of the misogynous tract. In it he rails against "woemen the gate to perdition." At length Euphues analyzes the faults of women in this manner:

"It is a worlde to see how commonly we are blynded with the callusions of woeman, and more entised by their ornaments being artificiall, then their proportion being naturall. I loathe almoste to thincke on their oyntments, and apoticaire drugges, the sleeking of their faces, and all their slibber sawces, which bring quesinessse to the stomache, and disquyet to the minde."

The last sentence admirably sums up the message of the "letter": "I bidde thee farewell, and flye women."

The success of Euphues; the Anatomy of Wit encouraged Lyly to present a sequel two years later (1580) in Euphues and his England wherein Euphues and Philautus travel to England. In The Anatomy of Wit Euphues' coming to Naples from Athens and his dealings with Neapolitan society has traditionally been considered as autobiographically representative of Lyly's leaving the university for London. But if we must understand Bond, I, 254.
Neapolitan society in the first book to really mean London society, then in *Euphues and his England* the frame of reference is more highly specific. This is courtly English society to which Lyly is holding up the mirror, as it were, in the second book.

Most significant, however, is Lyly's addressing *Euphues and his England* not to gentlemen, but rather "to a class which had hitherto been neglected--'the ladies and gentlewomen of England.'" The reading element among English gentlewomen had been steadily increasing through the years, and in addressing his second book to the ladies Lyly was the first popular author to recognize that fact. In addition, in the superficial and artificial context of a love-debating society, it would only be fair and conventional that the overtly misogynous *Anatomy of Wit* be counterbalanced by a work more positive in its attitude toward women.

*Euphues and his England* is a larger and more carefully detailed work than *The Anatomy of Wit*. When he is not dwelling upon the glories and superiorities of England, Lyly shows a more than rudimentary talent for character portrayal. Again *Euphues and Philautus* are more abstract than human; perhaps this is as it should be for they are most importantly the eyes and ears through which Lyly presents England. Therefore there is not too great a sense of incompleteness

---

*O. Wilson, p. 74.*
when these two fail to function as recognizable human beings.

However, *Euphues and his England* is chronologically significant in that it gives an early indication of Lyly's talents for feminine characterization, talents which were to be realized much more effectively later in his dramatic works. The disputes and love debates of the plot, those pastimes "that might be pleasant, but not unprofitable, rare, but not without reasoning," are perfect situations in which to place the "new" woman, situations which were undoubtedly being re-enacted at the time in Elizabeth's court. And in Camilla and Lady Frauncis, Lyly creates two fine examples of what the woman of the Renaissance should be.

Lyly makes it clear that one element in favor of Camilla and Lady Frauncis is the fact that they are Englishwomen. The observant Elizabethan reader would surely remember that the fickle Lucilla of *The Anatomy of Wit* was an Italian. But there is more to recommend these two women than the bare fact of nationality. Camilla does reject Philautus, as did Lucilla, but the rejection stems from an earlier and admirably faithful devotion to Surius rather than fickleness. Camilla is beautiful and intelligent and is an able entrant into debates and disputes. And she admits she enjoys being "in this good company, displaying my mind...."

And, if Camilla is unattainable, there is certainly no dearth of similarly endowed young ladies in the English...
court. Philautus may turn to Lady Frauncis "with hir accustomable boldness, yet modesty" whom Philautus "perceived so sharp." In one particularly notable scene of the book we are presented with the picture of Camilla debating against Surius, Philautus against Frauncis, while Euphues acts as judge. Here men and women function as intellectual equals, although the ladies are both susceptible to the vagaries of love. For even ladies "that are most wise...are not free from the impressions of Fancy."

Lyly made his dramatic debut in 1583 with *Campaspe*, "Played before the Queenes Maiestie on newyearaes day at night, by her Maiesties Children, and the Children of Paules." *Campaspe* is a romantic drama, an Ovidian romance in dramatic form. For his sources Lyly used Pliny's *Natural History*, North's translation of Plutarch's *Life of Alexander*, Diogenes Laertius' *Vitae Philosophorum*, and possibly Castiglione's treatment of the Pliny anecdote in *The Courtier*.

Alexander was a popular figure during the Renaissance, and in dramatizing this episode in the legend of Alexander, Lyly was catering to public taste. The story of Alexander's love for his beautiful Theban captive, Campaspe, and his subsequent magnanimous resignation of Campaspe to Apelles, the painter, was an especially popular tale. In Lyly's *Campaspe* G. Wilson Knight sees the dramatization of a typical Renaissance

The dates of all plays are from MW. Chambers' *The Elizabethan Stage.*
conflict: soldiership versus love. The central problem of the play is also the problem of the age: what is the perfect courtly, humanistic existence? This is the sort of problem intrinsic to a book like Castiglione's *The Courtier*. And Lyly characteristically uses ancient sources as a basis for dramatizing these essentially courtly Elizabethan conflicts and problems.

Hephaestion, Alexander's general, is Lyly's own representative of the misogynous tradition. In attempting to persuade Alexander to forget Campaspe, he says:

> You, Alexander, that would be a God, shew your selfe in this worse than a man so soone to be both overseene and overtaken in a woman, whose false teares know their true times, whose smooth words wound deeper then sharpe swordes. There is no surfeit so dangerous as that of honney, nor anye poyson so deadly as that of loue; in the one phisicke cannot preuaile, nor in the other counsell. (L.ii.)

This plea is spoken in the context of a typically Renaissance love debate between Alexander and Hephaestion, and while it is an attempt on one level simply to dissuade Alexander from marrying beneath his station, its inherently misogynist tone is readily apparent.

Of all the characters in the play, however, Campaspe, with the possible exception of the bitter and iconoclastic Diogenes of Sinope, is the most human and dramatic. Alexander and Apelles emerge more as dramatic stereotypes than human beings. But Campaspe is always human and believable, although she is clearly a Lylian representative of the Renaissance
woman. Her early exchanges with Apelles prove that his
Petrarchan ideas of courtship are hardly a match for her
biting wit:

Apel. Is it not possible that a face so faire &
a wit so sharpe, both without comparison, shuld not
be apt to love.

Camp. If you begin to tip your tongue with cunning,
I pray XXX dip your pensil in colours; and fall to that
you must doe, not that you would doe. (III.iii)

Campaspe, however, proves to be more than a wit. She is
also a woman of considerable depth, and her dawning love
for Apelles is one of the charming features of the play. In
a soliloquy in which she considers the problem of choosing be-
tween the noble Alexander and the artist Apelles, she says:
"A needle will become thy fingers better than a Lute and a
distaffe fitter for thy hand then a Scepter." (IV.ii.) Her
superficial cleverness and wit only serve as a sort of cloak
for her basic simplicity and intelligence. Apelles assesses
the character of Campaspe correctly: "Campaspe is not less
wise then faire...." (IV.v.) A Theban captive is turned by
Lyly into a paragon of Renaissance femininity.

E. K. Chambers dates Sapho and Phao, Lyly's second play,
in the same year as Campaspe, 1584. The play is a fine ex-
ample of Lyly's tendency to use classical myth as a vehicle
for courtly situations. Here he uses the legend of a passion
between Sappho and Phao, but Sappho becomes a queen with a
court. Lyly's chief authority was Ovid's Epistle (Heriod XV),
and his subsidiary sources were Aelian's Varia Historia,
which was translated by Abraham Fleming in 1576, and Ovid's
Metamorphoses.

With this play we are introduced to the important problem of allegory in Lyly's courtly dramas. Lyly's version of the love of Sappho and Phao, the jealousy which drives Venus to have Cupid cool Sappho's affection for Phao, and Phao's final departure in despair had led scholars, Bond among them, to consider Sappho and Phao as flattery of Queen Elizabeth because it allegorically represents the relations between her and her suitor, the Duc d'Alençon. Elizabeth's vacillation and chicanery had caused Alencon to leave England on February 6, 1582. Support for this allegorical view is derived from the phrase, "the necessitie of the hystorie" in the Epilogue; the representation of Sappho as a rather majestic ruler, as opposed to Ovid's dark, short heroine; and Phao's departure to seek other destinies, an action which parallels Alencon's departure to assume the sovereignty of the United Provinces. Before accepting this allegorical analysis, however, and in considering later ones, it might be well to consider E. K. Chambers' view that it "would have ruined Lyly's career to allegorize the queen."

In Sappho and Phao Venus is clearly the villainess, and it is feminine passion, a passion for Phao, which drives her to her villainy. Sapho is a woman of considerable dignity, and even her moments of passion are no more than extended, languorous sighs. She is essentially lifeless, and her

E. Chambers, III, p. 415.
lifeless reserve is perhaps most evident in her final speech:

I will wish him fortunate. This will I doe for Phao, because I once loued Phao; for never shall it be said that Sapho loued to hate, or that out of love she could not be as courteous, as she was in love passionate. Come, Mileta, shut the doore. (V.v.)

The tone conveyed by the last sentence is a sort of crystallization of Sapho's passivity.

Both Sapho and Venus are women of power, and Sapho and Phao is a drama ruled and guided by women. However, it is the play's group of courtly ladies who capture most attention. Their discussions of love recall similar discussions in Euphues, and it is probable that these lively neo-Platonic and Petrarchan discussions among the ladies were modeled upon similar daily discussions in Elizabeth's court. Mileta is the unofficial chief of these ladies, and in her, rather than in Sapho, do we see a recognizable woman. The gossip of these courtly ladies is a biting satire on feminine chatter, and Lyly handles this satire amusingly and interestingly. Of the women Mileta is the most impudent. To use an Elizabethan term, she is an "vp-start gentlewoman."

Here are two of her opinions, the first on love, the second on men:

I laugh at that you call love, and judge it onely a word called lour. Me thinks liking, a curtesie, a smile, a beck, and such like, are the very Quintessence of lour. (I.iv.)

It is good sporte to see them want matter; for then fall they to good manners, hauing nothing in their mouthes but 'Sweet Mistresse,' wearing our hands out with courtly kissings, when their wits faile
Lyly's next play, *Ballathea* (1584-88), combines mythological and pastoral elements. For the story of the virgin tribute paid to Neptune Lyly had two or three classical sources, Ovid's *Metamorphoses* among them. Ovid also deals with the subject of the sex change. Lyly was indebted to Reginald Scot's *Discoverie of Witchcraft*, published in 1584, for the alchemical terms which figure in the play. The *Alchemist* is not essential to the play, but it introduced most obviously to serve as a scapegoat. Making fun of the *Alchemist* is related to Lyly's parody on spells in *Euphues* and condemnation of witchcraft in *Endimion*. During the Renaissance the belief in wizards and alchemists had declined, and it was considered enlightened thinking to satirize these practitioners.

The plot of *Ballathea* deals with the attempts of two fathers to disguise their daughters, Gallathea and Phillida, as boys in order to evade the virgin tribute to Neptune. The two disguised girls meet in the woods and fall in love, each thinking the other to be male. Finally, in order to gratify their mutual attraction, Venus decides to turn one of the girls into a boy. Lyly skillfully relates the actions of these two girls to the plot. Disguised as boys, neither is ever really sure of herself, and their signs of affection toward each other are shy and uncertain:

> Jeffrey, pp. 97-8.
Phil. (Aside.). What doubtfull speeches be these? I feare me that he is as I am, a mayden.

Galla. (Aside). What XXXX dread riseth in my mind. I feare the boy to be as I am a mayden.

Phil. (Aside). Tush, it cannot be, his voice shewes the contrarie.

Galla. (Aside). Yet I doe not thinke it, for he woulde then have blushed.

Phil. Have you ever a sister? (III.iii.)

Each is a likeable, sty "mayden."

There are in the play, however, other representatives of womankind who are less maidenly. Telusa, a nymph of Diana whom Cupid capriciously inspires with a passion for the disguised Phillida, has a more clearly sensual awakening. She and another nymph, Eurota, inspired by Cupid to love the disguised XXXX Gallathea, enter into a conversation which expounds two basic neo-Platonic concepts:

Tel. Thou hast told what I am in vttering what thy selfe is: these are my passions, Eurota, my unbridled passions, which I were as good acknowledge and craue counsell, as to denie and endure perill.

Eurota. How did it take you first Telusa?

Tel. By the eyes, my wanton eyes which conceiued the picture of his face, and hangd it on the verie strings on my hart. O faire Melebeus! O fond Telusa! But how did it take you Eurota?

Eurota. By the eares, whose sweete words suncke so deep into my head, that the remembrance of his wit hath bereaued me of my wisedom; o eloquent Tyterus! o credulous Eurota! (III.iii)

This illustrates the concept of the two means of contact with physical and spiritual beauty in the neo-Platonic context. The body is reached through seeing and the soul through hearing.
Another notable feminine type in the play is the unidentified Nymph of Diana who appears in a brief exchange with Cupid in the second scene of Act One. She is an obvious continuation of the type of woman first created by Lyly in Miletus: clever, witty, impudent, extremely poised, and self-assured.

In the epilogue to Gallatea Lyly makes direct appeal to the courtly ladies in his audience, asking them to yield to love and telling them that love conquers all things but itself and ladies all hearts but their own.

Endimion (1588) is a compressed and involved play. In Lucian's short dialogue (Deorum Dial II) Lyly found the incident of Selene drawing for Venus a picture of Endimion sleeping on his cloak after hunting. Endimion was subsequently awakened by Cynthia's kiss. There is also a brief allusion to the story in Ovid's Art. Am. The most consistent critical attitude toward the play is one which considers it completely allegorical. Before accepting this allegorical interpretation, however, it might be advisable to note again Ek. Chambers' belief that Lyly would have ruined his career by allegorizing Queen Elizabeth.

The traditional allegorical interpretation sees Endimion as a representation of Robert Dudley, Earl of Leicester, and Cynthia a representative of Elizabeth. Briefly, the story deals with the love of Tellus for Endimion, who has abandoned her to pursue his unrequited passion for Cynthia.
has a witch charm Endimion into a forty-year slumber. He is finally awakened by a kiss from Cynthia, who will not openly return his love, and Tellus is graciously pardoned. Bond argues that Tellus is Mary of Scotland, for a match had been contemplated between Leicester and her in 1563-5.

Feuillerat, on the other hand, differs from this conventional interpretation of Endimion's allegory. He feels that Lyly would have been foolish to allegorize Leicester, a favorite with the queen. (Although it would appear that this type of logic would automatically support Chambers' attitude, Feuillerat maintains that Cynthia is Elizabeth.) In support of his view that Endimion is not Leicester, Feuillerat notes that Lyly was a satellite of Oxford's anti-Leicester clique and would obviously be the last person in the world to plead Leicester's cause. He believes, rather, that the play allegorizes negotiations for a league between Elizabeth and James of Scotland.

At any rate, the play is clearly courtly in atmosphere, and the original mythology is hardly apparent. Endimion is very obviously a courtier, and Cynthia a queen surrounded by a court. The implied Moon-Earth allegory would also tend to support the conventional interpretation of the play, for the remote and chaste Cynthia as the Moon and the sensually passionate Tellus as the Earth would certainly work toward convincing Elizabethan audiences that the former was Elizabeth and the latter Mary.

\[\text{Bond, III, pp.9-10.}\]
\[\text{Feuillerat, p. 202}\]
Cynthia is a woman of great majesty. It might be said that she represents the ideal woman ruler. At the same time she appears a sort of "divine" creature, a goddess, "one that all the world wondreth at." Endimion, in courting Cynthia, is decidedly similar to Keats' hero of the same name, for both are seeking a sort of ideal beauty or love:

End. Why troublest thou me, having neither head to conceive the cause of my love, or a hart to receive the impressions? followe thou thine owne fortunes, which creepe on the earth, & suffer me to flye to mine, whose fall though it be desperate, yet shall it come by daring. (I.i.)

Cynthia is clearly an idealization, an Elizabethan personification of the chaste, wise, fair superwoman.

Tellus, on the other hand, is earthy and sensual and has all the characteristics of a woman whose love has been scorned. She pursues "a reuenge incredible, and if it may be, unnatural." But, in spite of these dark tendencies toward revenge, Tellus is particularly Lylyan in that she is at the same time wise and "faire." However, in playing her jailer, Corsites, for a fool, she "will practice that which is most customarie to our sex, to dissemble." (IV.1.) Of all the characters in the play Tellus, principally because of the depth of her passion and designs, is the most dramatic. As G. Wilson Knight says, "There is something dark and tragin in the passion of Tellus for Endimion." 10

A lesser character who deserves mention is Semele, the beloved of Eumenides, Endimion's friend. She is Lyly's per-
sonification of the shrew, a female prototype whose appearance in the woodcuts and literature of the age reflects the fascination that the concept of the shrewish woman held for Elizabethans. Semele is the "very waspe of all women, whose tongue stingeth as much as an Adders tooth." And, in Endimion, as in Sapho and Phao, one of the features of the play is the lively discussion of love by the court ladies. Again, the emphasis is upon the Petrarchan and neo-Platonic, and the ladies involved in the discussion are amusingly grave.

Mother Bombie (1587-90) presents a problem. It seems to have almost no Lylian characteristics. Of all of Lyly's plays it alone seems to have no direct source, although the idea of rascally servants aiding their young masters in marriage schemes against the parents' wishes is obviously from Terence. The tradition of child-changing and the subsequent discovery of this which resolves the plot is also Roman. But, in addition to its lacking a source, Mother Bombie contains none of the courtly, mythological, or allegorical elements which characterize Lyly's plays. Here he abandons the somewhat idealized Lylian world and creates a realistic picture of life.

The play is largely peopled by the stock characters of Italian comedy: the avaricious old man, rascally servants, the Balia, the young student in love. Bond ascribes the play to Lyly because it was performed by the Paul's boys, its scene is laid in Kent (Lyly's native region), its use of typically Lylian phrases, and its inclusion in Blount's Six Court Comedies.
of 1632.

Violet Jeffery, however, finds these arguments "far from convincing" and argues that "it would be hard to find a play of the time more unlike the rest of Lyly's work." K.N. Colville assumes a relatively safe position in the debate by concluding, "The play was probably an experiment."

Because the figures in Mother Bombe are largely stock characters, most of them are basically unreal, and the play is distinguished by little notable character development. Mother Bombe, who would seem the principal character, is really of little interest. She is neither essential to the plot nor does she have any real influence upon the other characters aside from the fact that they have recourse to her to have their fortunes told. In this respect she is different from Dipsas, the enchantress of Endimion, for Dipsas is an integral part of the plot.

Of the three young women in the play, Livia is the most outstanding. Her character alone would seem to prove Lyly's authorship of the play, for she is clearly a sister to Mileta of Sapho and Phao, a bright young woman with dancing wit and a piercing mentality who speaks "wittily but uncivilly." In the following speech, discussing matches made by parents, she is criticizing an Elizabethan social custom of long standing:

Indeed our parents take great care to make us ask for blessing, and say grace when as we are lyttle ones, and grow to yeeres of judgement, they doe priue us of the greatest blessing, and the most gracious things to our minde, the libertie of our

---

44. Jefferym p. 114.
45. K. N. Colville, p. 95.
mindes... For mine own part (sweete Candiua) they shall pardon me, for I will measure my loue by mine owne jugdement, not my fathers purse of peeuiushness.

(I. iii.)

We suspect that there is hardly any subject upon which Livia will not express her forthright opinion, for she is a "girle that knows her lerripoope."

The only two other girls who figure to any extent in the play are Serena and Silena. Serena is a rather static character whose only notable characteristics are refined manners, poise, and cultivated speech. She is, however, a sincere character. Silena, on the other hand, is mentally retarded, and, in the age of Elizabeth, qualified as a very comic character. Strangely enough, Silena remains one of Lyly's funniest creations:

My name is Silena, I care not who know it, so I doo not: my father keeps me close, so he doa: and how I have stolne out, so I haue, to goe to olde Mother Bomble to know my fortune, so I will; for I haue as fayre a face as euer trode on shoo sole, and as free a foote as euer lookt with two eyes. (II.iii.)

When asked her age, this "lunaticke or foolish" girl replies, "I shall be eighteene next beare-baiting."

Between 1589 and 1590 Lyly wrote Midas, a mythological-pastoral-allegorical play based upon the familiar legend of the golden touch. The story of Midas is told in Ovid's Metamorphoses. The date of composition is an important factor in making the allegorical interpretation of the play plausible. Midas is generally taken to represent Philip of Spain. The presence of a court and the play's basically courtly atmosphere would seem to support this point. Also, Midas' greed may easily allegorize Philip's ambitious designs on territories.
and, more particularly, his greed for gold which Spain's possessions in the Western hemisphere were producing. The unsuccessful attempts of Midas to subdue the Island of Lesbos (England) represent the defeat of the Armada in 1588.

Lyly's interest in this play is most obviously directed toward developing the career of Midas, for his principal theme seems to be a satire on greed, a theme which exists only in connection with Midas. As a result, the women in Midas occupy a relatively minor position. Most notable among them is Sophronia, the daughter of Midas. She is a representative of the Sapho-Cynthia tradition. Lyly, however, succeeds in making her just as noble but less majestic than either Sapho or Cynthia. This may attest a delicacy in Lylian character portrayal which is able to differentiate between princesses and queens. Sophronia is wise, courageous, and capable of talking with the king's counsellors as an equal or managing the ladies of the court. Into the superficial and light atmosphere of the court, particularly the atmosphere of the court ladies, she injects a tone of wisdom and sense:

Soph. And thou, Caelia, and all you Ladies, learn this of Sophronia, that beautie in a minute is both a blossom and a blast: Love, a worme which seeming to live in the eye, dies in the hart. You be all yong, and faire, endeavor all to be wise & vertuous, that when, like roses, you shal fall from the stalks, you may be gathered and put to the still. (II.4.)

Along with Sapho and Phao and Endimion, Midas deals in
part with the trivialities of the court ladies. Of these court ladies Suavia is the most compelling. She is witty, impudent, outspoken woman, an extension of the type of woman Lyly created earlier in Mileta of Sapho and Livia of Mother, a woman whose "tong is so nimble it will never lie still." Her caustic wit all but disrupts the discussions of the ladies (III.iii.), so that Sophronia must plead, "Let our coming sport not turne to spight."

Love's Metamorphoses (1589-90) is a "wittie and Courtly Pastorall." Lyly's source was Ovid's Metamorphoses, and possibly Boccaccio's Filocolo. In brief, this play tells the story of three of Ceres' Nymphs who disdain the love of three foresters. For this Cupid turns the nymphs into a rock, a rose, and a bird. The almost overpowering sub-plot concerns Ceres' revenge on Erisichthon, a wealthy farmer who killed one of her nymphs.

Ceres' three disdainful nymphs, Nisa, Celia, and Niobe, those "immodest" and "silly girlies," are the play's most lively characters. They are "cruell Nisa, borne to slaughter men," "coy Celia, bred vp in skoffes," and "wavering, yet wittie Niobe," all projections of Lyly's earlier Mileta, Suavia, and Livia. The three nymphs are witty, impudent, obstinate, and scoffing:

Niobe. Inconstancie is a vice, which I will not swap for all the vertues; though I throwe one off with my whole hand, I can pull him againe with my little finger; let vs encourage them, and write something; if they censure it favorable, we know them fooles; if angrily, we wil say they are froward. (I.iii.)

They are the girls whom nothing will "move." Significantly,
the close of the play sees them all "tamed" and ready to "consummate what Cupid hath commaunded."

Ceres is drawn in the tradition of Sapho, Cynthia, and Sophronia. She is a queen-symbol and exercises not only authority but also a terrible power if crossed. She is wise and acts as a sort of mentor and guardian for the nymphs in the same manner that Sophronia guided her court ladies. Ceres, however, is capable of showing more tender feeling than her actions of revenge would lead one to believe:

Ceres. My sweet Nymphs, for the honor of your sex, for the love of Ceres, for regard of your own countrie, yeeld to love; yeeld, my sweete Nymphes, to sweete loue. (V. iv.)

And love is certainly the guiding force in this play in which the dramatic action gradually moves toward a matrimonial conclusion marked by its ceremony.

E. K. Chambers dates The Woman in the Loone as Lyly's last play, written between 1590 and 1595. He bases his decision chiefly upon the fact that this, Lyly's only play in blank verse, is written in the verse of the '90's rather than the '80's. The play is chiefly pastoral in type, though it contains certain characteristics of the masque and the mythological play. Four Utopian shepherds pray to Nature for a woman. Nature creates Pandora, but in the process robs all the goddesses of their best features. The Seven Planets grow jealous and decide to ruin Pandora by exercising upon her in turn their worst influences. Finally, the shepherds want only to be rid of her, and Nature graciously relegates
Pandora to a sphere of the Moon.

Lyly's sources for the play were Robert Greene's *Planetomachia* (1585), Geoffrey Fenton's *Certeine Tragicall Discourses written out of the Frenche, etc.* (1567), and the play *The Rare Triumphs of Love and Fortune*.

The Woman in the Moone is essentially undramatic and is related to the more spectacular masque, but it is immensely important to this study because it is Lyly's only drama completely misogynous in tone. Of the Seven Planets who influence Pandora in turn, only one, Sol, exerts any good influence:

Sol. She shalbe louing, liberall, and chaste,
Discreet and patient, mercifull and milde,
Inspired with poetry and prophesie,
And vertues apperteyning to womanhoode. (III.i. 7-10)

The other planets succeed in making Pandora uniformly unpleasant. Saturn makes her melancholy, sullenly sorrowful, "selfwild, and toungtide, but full fraught with teares." Under the influence of Jupiter she is filled with "Ambition" and "Disdaine." Mars turns her into a "vixen Martalist." Venus says:

Ile haue her wittie, quick, and amorous,
Delight in raswels and in banqueting,
Wanton discourses, musicke and merry songs. (III.iii.2-4)

Under Mercury she becomes "theeuish, lying subtle, eloquent," and finally Luna appears to make her "new fangled, fyckle, foolish, mad."

When Nature intervenes to dispose of Pandora, Pandora begs that she be relegated to Luna:
Pan. Fayre Nature let thy hand mayd dwell with her,
For know that change is my felicity. (V.1.300-301)

Again she makes a more detailed plea:

Pan. But Cynthia made me idle, mutable,
    Forgetfull, foolish, fickle, franticke, madde;
These are the humors that content me best,
And therefore will I stay with Cynthia.  
(V.1.307-310)

In finally deciding to place Pandora in the custody
of the Moon-Cynthia-Luna, Nature expresses Lyly's theme in
the play:

Nat. Now rule, Pandora, in fayre Cynthia's steedes,
    And make the moone inconstant like thy selfe;
    Raigne thou at womens nuptials, and their birth;
    Let them be mutable in all their loves,
Fantastical, childish, and foolish in their
    desires,
Demaundering toyes:
    And starke madde when they cannot have their
    will.  
(V.1.320-326)
