

104  
The WHITE PELICAN (*Pelecanus erythrorhynchos*) comes to the coast and bays of Point Reyes for the winter, after breeding on lakes in the interior. These large birds can often be found resting on offshore rocky islets in the company of Brown Pelicans, making Point Reyes one of the few places in the United States where White and Brown Pelicans can be seen together.

Dear Mrs Toole

Upon sending off  
my note of 3/13/81  
~~off~~ to you, I came  
across this card  
& thought you  
would enjoy it as  
well.

Stamp box: STAMP

Had I had the  
card when I <sup>was</sup> writing  
you I would have  
sent it, so I might  
as well send it  
now (with no further  
explanation)!

The point Reyes area is  
close to where I live.  
The birds in flight are <sup>best</sup>,  
quite beautiful — Ken <sup>Drac</sup>
