

RODIE, Sr B

an✓

(250)

14, Sacille Ave

June 7 1892.

My Dear Brando

I thank you very  
much for your kind letter;  
I am very glad to find that  
you have been at all  
interested by my discussion of  
Bucine fork.

But I am really vexed to  
find that I omitted to

send you a presentation copy,

It was I spent altogether six  
evenings, one evening I made  
out a list of friends & others  
to whom I wished to send ~~the~~  
copies, & sent it off by the  
post to Longman, without  
looking it over afterwards.

It was then I was sorry to  
see that I neglected to send  
it to you as well as  
to your ex friend other friends.

I do not send you a copy now, &

I find that you have already read  
the book, but shall send you  
new & improved edition, &  
think I may have the opportunity  
of making use of the facts which  
you have sent me,

Yrs most truly

B. C. Brooke

**BRODIE, Sir Benjamin Collins** (1783–1862). Surgeon.

ALS to Brande, 3 pages 8vo, 14 Saville Row, 7 June 1854. Apologising for forgetting to send Brande a presentation copy of his latest book, and promising to send a copy of the new edition, when published.

*'... One evening I wrote out a list of friends & others to whom I wished to send copies, & sent it off by the post to Longmans without looking it over afterwards. It was thus I am sorry to say that I neglected to send it to you as well as to four or five other friends. ...'*

In 1854, Brodie anonymously published *Psychological Inquiries*, a series of essays positing a relationship between physical and mental health. William Thomas Brande (1788–1866) was an eminent chemist.
